# Compliance Requirements

- **LOCATION OF MANUFACTURER:**
  - All machines are built at the Crane Merchandising Systems manufacturing facility, located at 3330 Crane Way, Williston SC 29853, USA
- **DATE OF MANUFACTURE:**
  - Date of manufacture can be determined by viewing the Manufacturing Date on the Serial Number decal, located on the top left rear corner of the back of the machine cabinet.
- **PERMITTED & NON PERMITTED USES OF THIS MACHINE**
  - This machine is designed to dispense pre-packaged beverage, and similar products. Use of unwrapped food products is not permitted.
  - It is not permitted to use this machine outdoors, or in an environment where flammable or explosive vapors are present.
  - This machine is not designed, nor should it be used to dispense flammable or explosive items, nor any other item that could not be safely dispensed.
  - This machine is not suitable for installation in an area where a water jet could be used.
  - The appliance is not to be used by persons (including children) with a reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction. Children must be supervised not to play with the appliance.
- **Nutritional Content Information**
  - Crane Merchandising Systems is providing the nutritional content information, based on information provided by the product manufacturers, and Crane MS is cannot accept responsibility for content created by others.

# Compliance Requirements

All models are built to meet or exceed all applicable standards, including but not limited to:

- International (CE) Approvals to meet or exceed the below listed standards:
  - 2006/95/EC Low Voltage Directive
  - 2004/108/EC EMC Directive
  - EN 55022, Class A Limits
  - EN 61000-4-2, Electrostatic Discharge (ESD)
  - EN 61000-4-3, Radiated Immunity
  - EN 61000-4-4, Fast Transient Burst (EFT)
  - EN 60335-1, Safety of household and similar electrical appliances.
  - EN 60335-2-75 Particular requirements for commercial dispensing appliances and vending machines
  - EN 60335-2-24 Particular requirements for refrigerating appliances (when applicable)
  - EN 61000-4-5, Surges
  - EN 61000-4-6, Conducted Immunity
  - EN 61000-4-11, Voltage Dips and Interruptions
  - EN61000-3-2, Harmonics
  - EN61000-3-3, Flicker
  - EN55022, Conducted & Radiated Emissions
  - EN55014-1, Continuous Disturbance, 4.1.1
  - EN55014-1, Disturbance Power, 4.1.2
  - EN55014-1, Discontinuous Disturbance, 4.2
- Machines built for the US Market meet or exceed the requirements for UL751 for ambient machines, and UL541 for chilled machines, and have also been reviewed and passed the NAMA Construction Standard, and are permitted to bear the NAMA Mark.

# Specifications

- **NOISE LEVEL**
  - This machine operates at less than 70 db (A).
- **ACCEPTABLE AMBIENT OPERATING TEMPERATURE RANGE.**
  - This equipment was designed and tested to work properly in a temperature range of 10°C to 32°C (50°F to 90°F) in still air (45% Relative Humidity, non-condensing). Usage at ambient conditions outside the range of the testing may cause unacceptable appearance or performance.
- **STORAGE CONDITIONS**
  - The machine capable of being stored in a temperature range of -18°C to 68°C (0°F to 155°F). Storage temperatures below 0°C (32°F) require that the operator to take the required precautions to ensure that any water is removed from the condensate system prior to storage.
- **INDOOR USE ONLY**
  - This machine is designed to be used in an Indoor Setting only. Indoor Setting is defined as inside a structure constructed with four walls and a roof, and sufficiently protected from ambient conditions and not subjected to the effects of weathering. Any other usage is in direct violation of these instructions, and will void the warranty of the machine and its components.

# Specifications

## BevMax Media (Wide & Narrow)

Specifications	Model 3800-6 Domestic (Narrow)	Model 3800-6 Export (Narrow)	Model 5800-6 Domestic (Wide)	Model 5800-6 Export (Wide)
Height	73 inches	185 cm	73 inches	185 cm
Width	40 inches	99 cm	47 inches	119 cm
Depth	33.5 inches	81 cm	33.5 inches	81 cm
Floor Space	9.07 Sq ft	.84 Sq Meter	10.93 Sq ft	1.02 Sq Meter
Container Size	44.4 Cu Ft.	1.26 Cu Meter	61.6 Cu Ft.	1.74 Cu Meter
Shipping Weight	648 lbs	294 kg	701 lbs	318 kg
Voltage (AC)	120V	230V	120V	230V
Running Amperes	10.2A	5.8A	10.2A	5.8A
Refrigerant Charge (R134A)	9.5 oz	0.269 kg	9.5 oz	0.269 kg
Compressor size	1/3+ hp	1/3+ hp	1/3+ hp	1/3+
High Side Test Pressure	250 psi	17.24 bar	250 psi	17.24 bar
Low Side Test Pressure	105 psi	7.24 bar	105 psi	7.24 bar

# Cautions & Definitions

**It is critical that all cautions and warnings be reviewed and complied with during the unpacking, installation, operation, and repair of this machine**

**CAUTION:** This machine is designed for indoor usage only. Any other usage will void the Manufacturer's Warranty

**CAUTION:** Any procedure marked with the symbol at left requires that the Machine have the power applied and a shock hazard exists. Only a trained and authorized person should attempt these repairs.

**CAUTION:** It is important that this machine is hooked up to the proper voltage and polarity for your country. Use a Voltmeter to verify voltage and polarity. Should the reading be any different than a normal reading or if you are unsure of what the reading should be, contact an electrician.

**CAUTION:** Different countries may have unique plug arrangements. Ensure that the machine is properly grounded before operating. .

**CAUTION:** The power cord for all machines are of a type X attachment. If the power cord is damaged, it should be replaced by a trained service agent, or a similarly qualified person in order to avoid a hazard.

# Cautions & Definitions

**CAUTION:** The machine is a heavy item. Ensure that sufficient personnel are available for lifting and transporting the machine. Use proper lifting procedures and equipment.

**CAUTION:** This machine is designed to dispense pre-packaged beverage and similar products. Use of unwrapped food products is in direct contradiction to these cautions.

**CAUTION:** Procedures marked with this symbol throughout this manual require the use of tools, and should only be completed by a trained technician or operator.

**CAUTION:** If this machine is used to dispense perishable product, and local health codes require that the machine monitor the cabinet temperature, and prevent vending when the temperature exceeds a defined limit for a period of time, then the Health Code function must be enabled for those affected selections – see Health Code Setup

**CAUTION:** The electronic system components in this machine utilize static sensitive components. Precautions for handling sensitive devices should be observed when handling these items.

# Inspection and Unpacking

The BevMax Media is assembled and packed so that a minimum amount of time is necessary for preparation to install it on location. The following steps are recommended to ensure correct unpacking.

- **Shipping Damage:** Thoroughly inspect the exterior of the carton for damage which may have occurred during shipment. Report any damage to delivering carrier and follow their instructions.
- Remove the remainder of the packing material. On machines shipped with the lock in place, the keys are taped inside the coin return.
- Removal of shipping boards: There is 1 methods available for removal of the shipping boards on the bottom of the machine, and they are dependent upon the style of packaging used: 2 flat shipping boards (Style A
- **Style A**
  - **a) Using a motorized lifting device (i.e. a forklift) raise the machine to a comfortable working height and remove the leg levelers with the use of a socket or wrench (1 5/16”). Do this on one side at a time. After the front and rear leg levelers are removed, the shipping board can then be removed. Replace the leg levelers in the legs of the machine before lowering to the ground, OR**
  - **b) When using a pallet jack (non-motorized) insert a pry bar into the slit on the front and rear of the wooden boards, and twist the bar to force the boards to split apart, and remove from the machine. Screw the leg levelers all the way in before lowering the machine to the ground.**
- **NOTE: On the machine, the weight concentration is toward the back of the cabinet. Trucking and lifting should be done from the back. CAUTION should be taken when trucking from side.**
- On machines with lock in place, first unlock and turn handle to open door. When no lock is furnished, remove clip and turn handle. Swing door to its full open position.
- Remove all additional packing material from the machine, including the shipping bolt and bracket from the delivery cup.

**Note: Remove tape from ends of top lamp in the top lamp assembly after placing the Vender on location, but before plugging the Vender in to an AC power supply.**

# Unpacking

## Remove Shipping Bolt

### Attention!

- To avoid machine damage, **remove the SHIPPING BOLT** from the lower left corner of the cabinet from the XY carriage prior to plugging the machine to an outlet!!
- Tilt the cup to be able to clearly see the Shipping bolt and bracket. Unscrew the shipping bolt and remove the screw and bracket.
- Store the shipping bolt and bracket for future use as illustrated.
- The Shipping Bolt must be installed any time the machine is moved or transported. Failure to do so may result in damage to the XY system.

Shipping Bolt Location

Storage Location for Shipping Bolt

## Daily Cleaning

Before leaving the machine each visit, the machine should be inspected and cleaned as follows:

- ① Glass – inside and out – use glass cleaner and disposable towels
- ② Front of monetary panel – do not use ammonia based cleaners as it may cause premature crazing of the polycarbonate surface. We recommend the use of Novus #1 plastic cleaner & polish.

For units equipped with a touch screen, never spray any cleaner directly on the touchscreen, nor permit liquids to flow onto the screen. Apply cleaner to a disposable towel and then apply to the pill or touchscreen. Treat the touchscreen as you would any sensitive electronic device and never use abrasive cleaning materials.

- ③ Delivery Cup and Delivery Port – Inside and out – clean any spills or residue with a mild soap and water solution, and wipe dry.

## Cashless Devices

- If your machine is equipped with a cashless device, whether it is a credit card reader, or a proprietary closed system pre-paid card, the magnetic head used to read the payment cards needs to be cleaned regularly to insure proper operation.
- The defined tool for cleaning a magnetic head is a pre-saturated cleaning card, which are commercially available from various sources.
- Based on credit card industry standards, the busier a machine is, the more frequently the magnetic head should be cleaned
- For cashless uses more than 100 times per day – clean it every day
- For cashless uses between 50 and 100 times per day – clean it every other day
- For cashless uses between 10 and 50 times per day – clean it one time per week.
- Actual conditions may vary, and be affected by site conditions, for example a machine located outdoors should be cleaned more frequently.
- Follow the instructions provided with the cleaning card, and slide it past the magnetic head as directed.
- Usage of the onboard swipe and other mag-stripe readers is currently only in use in the USA. Follow the Preventative Maintenance instructions provided by the manufacturer if you have a additional payment device.

# Preventative Maintenance

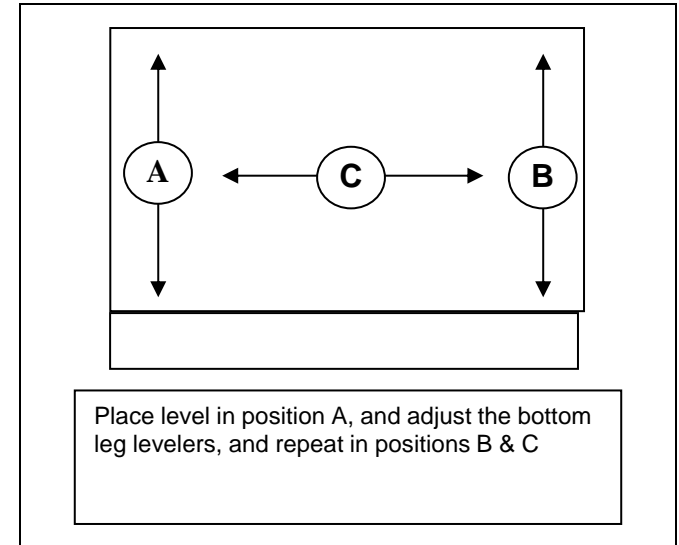

SERVICE AT EACH INTERVAL LISTED X WEEKS OR VENDS WHICHEVER COMES FIRST	Weeks	1	2	4	13	26	52
	Vends	500	1000	4000	15000	25000	50000
<b>REFRIGERATION SYSTEM –</b>							
AIR INLET SCREEN – SEVERE CONDITIONS		CLEAN					
AIR INLET SCREEN & CONDENSOR COIL			INSPECT	CLEAN			
AIR OUTLET SCREEN				INSPECT		CLEAN	
EVAPORATOR DRAIN TUBE					INSPECT	CLEAN	SANITIZE
EVAPORATOR DRAIN PAN					INSPECT	CLEAN	SANITIZE
CONDENSER COIL				INSPECT		CLEAN	
<b>PRODUCT DELIVERY SYSTEM</b>							
DELIVERY CUP AREA		CLEAN					
DELIVERY PORT		CLEAN		INSPECT		LUBRICATE	
MACHINE GLASS		CLEAN					
LAMP COVER		CLEAN					
TRAYS & PUSHER SPRINGS		INSPECT				CLEAN	
MAIN DOOR SEALS				INSPECT			
<b>MISCELLANEOUS</b>							
CABINET DOORS		CLEAN					
DOOR HINGE						INSPECT	LUBRICATE
LOCK HANDLE					INSPECT		LUBRICATE
PAYMENT SYSTEMS	FOLLOW MANUFACTURER'S RECOMMENDATIONS						
THIS SCHEDULE SHOULD BE FOLLOWED IN ADDITION TO THE "EACH VISIT" CLEANING RECOMMENDED IN THE SERVICE SECTION OF THIS MANUAL.							
CLEAN	CLEAN WITH APPROPRIATE CLEANER, DRY						
INSPECT	INSPECT FOR WEAR, PRODUCT BUILT UP OR BROKEN PART. AFTER INSPECTION- CLEAN, REPAIR, Lubricate OR REPLACE, as required						
LUBRICATE	SHOULD BE CLEANED, INSPECTED, AND REPAIRED BEFORE LUBRICATION. RECOMMENDED LUBRICATE IS A LIGHTWEIGHT FOOD GRADE GREASE.						
SANITIZE	USE A DILUTED BLEACH SOLUTION TO SANITIZE COMPONENTS						

# Installation

## Leveling the unit

- **Leveling the Machine**

- Leveling the machine on location is important for the proper function of the machine. There are four leveling screws in the legs of the machine to make any necessary adjustments. After positioning the machine, level it from front to rear and right to left directions. After leveling, test the operation of the lock assembly to ensure the monetary panel locks smoothly and securely.

**CAUTION:** This procedure requires the use of tools, and should only be completed by a trained technician or operator.

- **Clearance Requirements**

- It is necessary on all machines to have 25mm (1") clearance on the left side of the machine for the door to properly open to access the shelves.
- All chilled or refrigerated machines require 150mm (6") of clearance behind the machine for air circulation.

# Installation

## Electrical Supply Check

**CAUTION:** It is important that this machine is hooked up to the proper voltage and polarity for your country. Use a Voltmeter to verify voltage and polarity. Should the reading be any different than a normal reading, or if you are unsure of what the reading should be, contact an electrician.

### • Power Requirements

- The merchandiser is supplied with a service cord for the country of use, and is terminated in a grounding type. The wall receptacle used for this merchandiser must be properly polarized, grounded and of the correct voltage. Operating the merchandiser from a source of low voltage will void the warranty. Each machine should have its own circuit, and that circuit should be protected with a circuit breaker or fuse to conform to local regulations.
  1. **Voltage Check** - Place the leads of the voltmeter across the Line and Neutral sockets of the wall receptacle. The voltmeter should indicate a stable voltage in a range of 110 to 130Vac for 120V 60Hz locations, or 220 to 240Vac for 230V 50Hz locations.
  2. **Polarity Check** - Place the leads of the voltmeter across the Line and Ground sockets of the wall receptacle. The voltmeter should indicate a stable voltage in a range of 110 to 130Vac for 120V 60Hz locations, or 220 to 240Vac for 230V 50Hz locations.
  3. **Noise Potential Check** - Place the leads of the voltmeter across the Neutral and Ground sockets of the wall receptacle. The voltmeter should indicate zero voltage. A measurement greater than 1.5V could result in operational issues for the merchandiser's electronics caused by electrical noise.

**Note:** Any deviation from these requirements could result in unreliable performance from your merchandiser.

**CAUTION:** This procedure requires the use of tools, and should only be completed by a trained technician or operator.

# Payment Systems

The Media Merchandisers are capable of accepting multiple forms of payment systems using a Multi Drop Buss or Executive interface.

- All payment devices are mounted on the monetary panel assembly. The front of this slide out assembly is called a Pill. There are multiple configurations of the Pill available should you need to add or remove payment peripherals in the future.
- If your payment peripherals were installed at the factory they should already be enabled in the electronics, but you should verify that the notes you wish to accept are enabled.
- Instructions from the manufacturer for all peripherals installed at the factory are included in the bag assembly in the machine. Please refer to these instructions for information on filling coin tubes, adding bills to recyclers or other pertinent information.
- Please refer to the instructions that came with payment systems for set up and installation, and maintenance.
- See the service modes section of this document for information on enabling or disabling different bills and/or additional peripherals.
- Dependent upon the firmware version in use, currency symbols may change, based on the country of destination.

# Initial Setup

## Key Steps

- After unpacking and installing the machine on location the Key steps to setting up the machine the first time are:
  1. Load a change fund into the coin mechanism.
  2. Set the selection prices in the machine.
  3. Test vend at least one selection on each shelf to verify:
    - a. Pricing is correct, and coin mech, bill acceptor and credit card device are working correctly.
    - b. Product and nutrition information are correct.
    - c. Selection delivers products.
    - d. Delivery port rotates to correctly deliver product to customer.

# Filling the Machine

## Loading the Machine

- The BevMax Media 5800-6 & 3800-6 Vender does not require spacers or shims to vend most packages.
- If specified, cold product can be removed before loading, placing the warm product behind the cold product
- Load product in each column one product at a time ensuring that the package being loaded is in front of the product pusher.
- To load, hold the bottle by the upper portion and push the product firmly between the 2 gates, until it is behind the gates.
- Insure that the package is stable within the column (doesn't move excessively from side to side).
- After loading the vender, test vend each column to ensure proper operation.

Need  
photos

# Initial Start Up

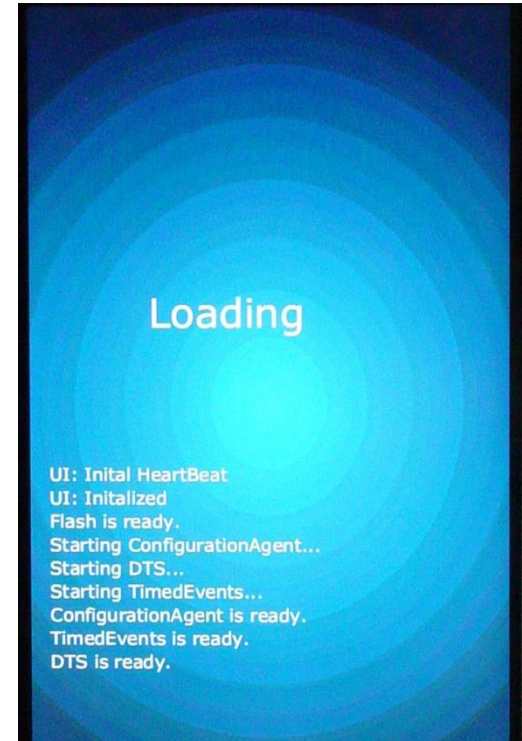

## Powering up the machine

Turn on the power switch located on front of the power box accessible by opening the Monetary panel.

**Power Switch**

The Media Merchandisers run on the Linux operating system, it is essentially a computer so it will take several minutes to power up just like your computer.

# Initial Start Up

## Programming tips

- This Programming Guide is based on software version 10.8.8 or higher
- The software version is shown on the bottom right of the display anytime you are in the Service mode. The software version can also be displayed by pressing the Firmware Information icon in the service mode and reading the LE board information.
- Earlier or later versions of software may not contain all the same menus and/or options. Some Menu items may also be in different places within the menus & program differently.
- This programming guide is specific about what icons or menu bars to touch within the Modes. When certain Menu items are enabled and disabled, additional menu items may appear or disappear. Most of the time this guide will be correct but rely on the display for the correct icons or menu bars to touch.

# Initial Start Up

## Quick Start Tips

Below is a list of Menus that should be set up or checked before operating the Machine:

1. When opening the service door on the machine you will be prompted for a PIN, enter 3333 on the touchpad.
2. Set the Prices by selecting button Price Icon in the service mode.
3. Make sure the Shopping Cart Size (max 3) and Shopping Cart Max Value is set to the cart size times the highest price in Product Configuration. Touch: Product Configuration > Shopping Cart Setup.
4. Verify your Coin Mechanism, Bill Validator and Card Reader are enabled in the Monetary Menu.
5. Verify the bills you want to accept are enabled in the Monetary Menu > Bill (Note) Acceptance.
6. Set the Time and Date in the System Setting Menu > Set Time and Date. Changing the time, date or time zone may require a machine reboot.

# Initial Start Up

## Quick Start Tips

### **If your machine contains a refrigeration unit, you must also set or verify the following:**

1. Verify or set the Configuration Version, go to System Settings > Press the lower half of the down arrow to scroll down and verify the Configuration Version is set correctly.
2. Two key settings for the Refrigeration Settings should be verified:
  - a) Refrigeration Set Point: Using the recommendation of your product supplier, set the correct Set Point, which is the target temperature for the entire machine. Default is 2°C.
  - b) Storage Set Point: This is the highest suggested storage temperature, which is dependent upon the products being used. The default is 7°C.
3. Press Done to save your choice.
4. If Health Control is required due to the presence of perishable products, it must be enabled to properly protect these products from spoilage.
5. Effective with the release of 10.8.x software, if Health Control is selected, all selections in the machine are enabled for Health Control. If you are not using perishable products in all selections, non-perishable products should have the Health Code disabled.

## Quick Start Tips – Loading the Coin Mechanism

Prior to placing the machine in service, you must add an initial amount of change to the coin mechanism to prevent a “Use Correct Change” condition. Initial loading of coins should be done through the menu provided to insure the coin mech accurately counts all change available for payback to the customer. *Recommended minimum amount is 20 each of the different tube coins.* This minimum amount of change should remain in the machine at all times. The currency symbol on the display will change as required by the country of destination, when connected to MDB payment devices.

### Adding Initial Change Load

1. Enter the required PIN: 3333,
2. Touch the Monetary Icon on the screen.
3. Touch the Coins In/Out menu Bar
4. Increase the amount of Change Available by inserting coins to thru the chute on the top of the coin mech. Totals (count and value) for each coin should increase as coins are added.
5. Press the left arrow to exit and return to the main menu.

Coin	Count	Value
0.05	35	\$1.75
0.25	20	\$5.00
0.50	15	\$7.50
1.00	1	\$1.00
0.05		

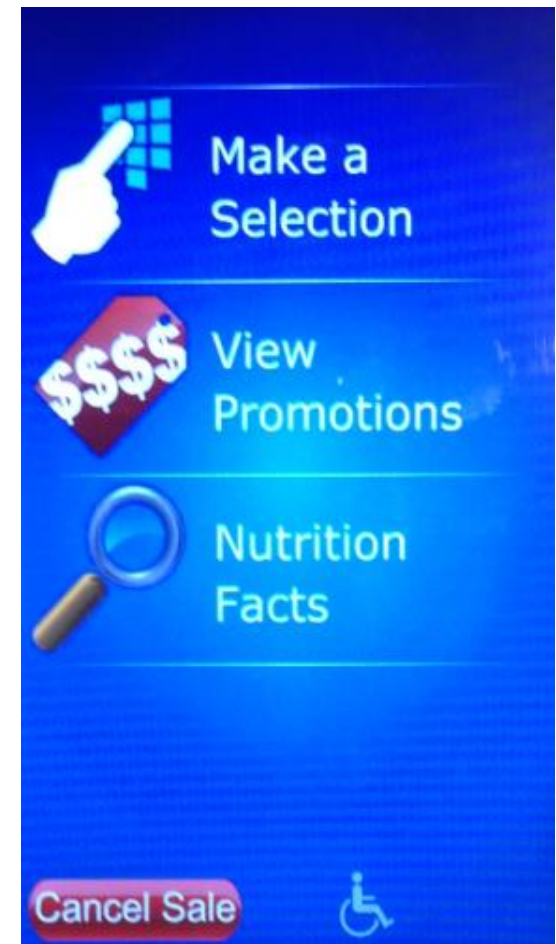

# The Selection Process

## The Main Menu

### Main Menu Screen

- The Main Menu allows your customer to view promotions when enabled and view nutritional facts when a Product Library is present.
- When product libraries or multiple promotions are not used this is an extra screen that is not necessary and bypassing it speeds up the vend process.
- When using planograms the customer can check the nutritional information when making a selection even if this menu is disabled.
- As a default the machine is set to Skip the Main Menu.
  - The menu item to turn the Main Menu on or off can be found in the Special Vend Modes menu.
- When the Main Menu disabled and the idle loop screen is pressed, the screen will immediately transition to the numeric keypad screen.

# The Selection Process

## Making Selections and Navigating the Shopping Cart

Use the Keypad to make a selection. Your selection will be placed in a shopping cart. The Keep Shopping and Checkout Icons will start flashing. Choose Keep Shopping to add additional selections (maximum of 3) to your cart. Press Check Out when finished.

Note: The shopping cart can be disabled by enabling Rapid Vend under the Special Vend Modes icon and the machine will immediately go to the Payment Screen after making a selection, or will vend if sufficient funds have already been deposited.

# The Selection Process

## Making Selections and Navigating the Shopping Cart

If you have a planogram installed, an image of the product will appear on the screen

Pressing the Information icon next to the product image will show a popup with nutritional information for that product

# The Selection Process

## Making Selections and Navigating the Shopping Cart

If you do not have a planogram installed, or a product assigned, an image of a generic product will appear on the screen

To remove a product from the shopping cart press the red X

# The Selection Process

## Making Selections and Navigating the Shopping Cart

Any Discounts or Surcharges will be shown to the right of the shopping cart as well as the Total of all products in the cart.

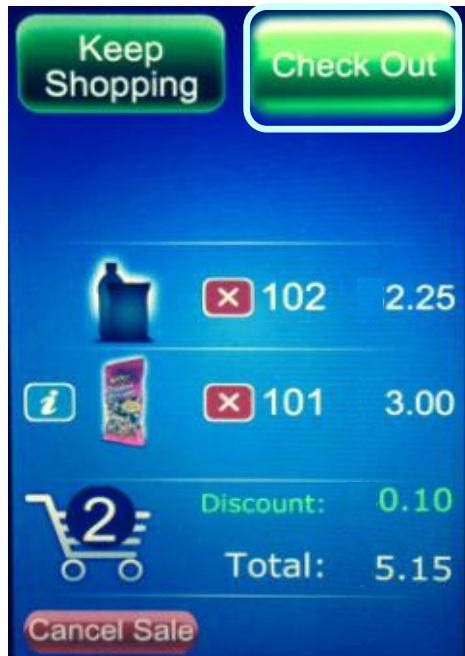

At any time you can press the cancel icon to cancel the entire sale. If nothing happens for 30 seconds (settable) the machine will cancel the transaction and go back to the idle screen

# The Selection Process

## Making Selections and Navigating the Shopping Cart

Any type of payment, cards, coin or bills can be inserted anytime during the transaction. Pressing Check Out will cause the settlement screen to appear if money has not already been inserted

The settlement screen will communicate to the customer their Monetary payment options. The choice about which cards will be displayed is made in the System Settings/Advertising menu

# Accessing the Service Modes

When the monetary compartment is opened, the display will prompt the operator to enter a PIN number on the Touch Screen to gain access to the service modes.

- The default PIN for route driver access is **1111** (limited access).
- The default PIN for programming access is **3333**.

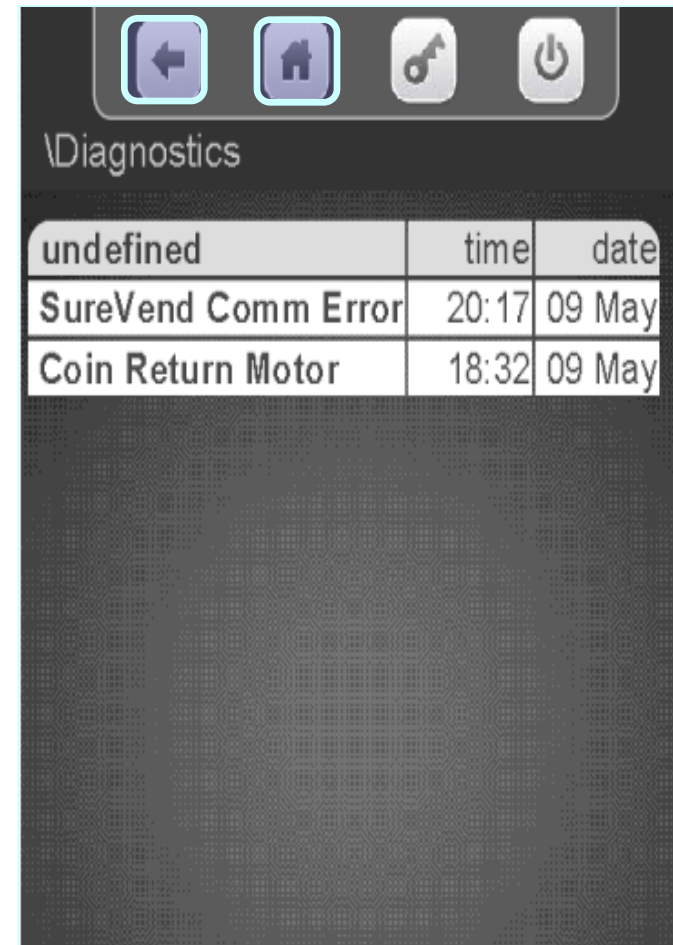

# Service Modes

## Initial Screens

If **Errors Exist**, an error list will be shown on the display that includes the time and date of each error.

The errors do not need to be cleared, once corrected the error will be erased automatically.

To escape to the home screen press the  Back arrow, or the Home Icon

The screenshot shows a control panel interface with a top navigation bar containing four icons: a back arrow, a home icon, a key icon, and a power icon. Below the icons, the word "Diagnostics" is displayed. A table lists error events with columns for the error name, time, and date.

undefined	time	date
SureVend Comm Error	20:17	09 May
Coin Return Motor	18:32	09 May

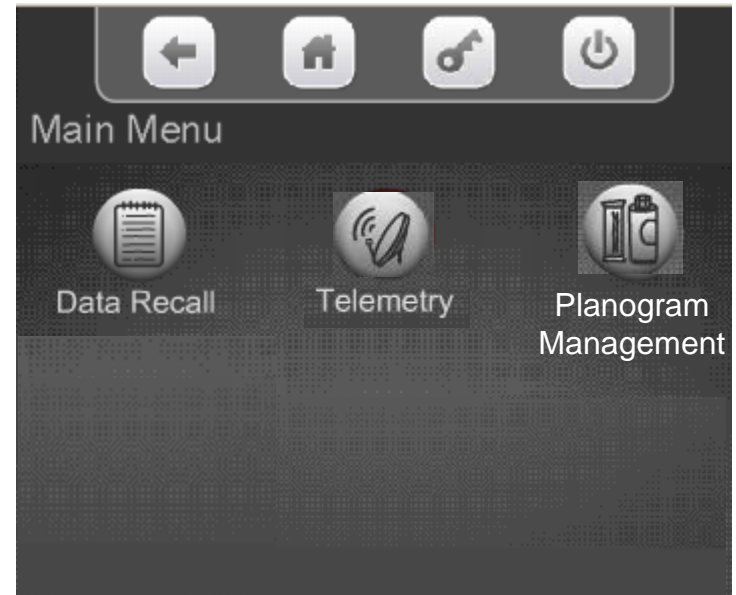

# How Do I Access the Service Modes?

If PIN **1111** was entered and **No Errors Exist**, the home screen for the Driver menu will appear. This menu allows limited access to the service modes. Touching an icon on the screen will provide access to that menu.

Driver Access allows you to:

- View Resettable and Non Resettable sales data.
- Send a wireless DEX read.
- Manage or Audit the existing Planogram.

**For access to all other service modes use PIN # 3333**

# How Do I Access the Service Modes?

- If PIN **3333** is entered and **No Errors Exist**, the home screen for the programming menu appears allowing access to all the Main Menu icons.
- Each of the icons on the screen represent a tiered menu that provides access to the menus under the corresponding heading.
- Pressing an Icon on the screen provides access to that menu.

# How Do I Access the Service Modes?

- For Programming purposes, the Merchant Media platform uses the 7" LCD touch screen and a series of icons to provide access to the Service Modes.
- Touching an icon will take you to the top level menu for that Service Mode.
- The concept of the touch screen and the use of icons is similar to many devices that feature touch screen technology.
- A successful touch of an icon will change the color of the icon, and sound a beep to acknowledge acceptance of the touch on the screen before proceeding to the selected menu.
- **Note:** An audible response (beep) will occur anytime the display is touched, and may not reflect successfully choosing an icon.

# How do I use the Touchscreen in the Service Mode?

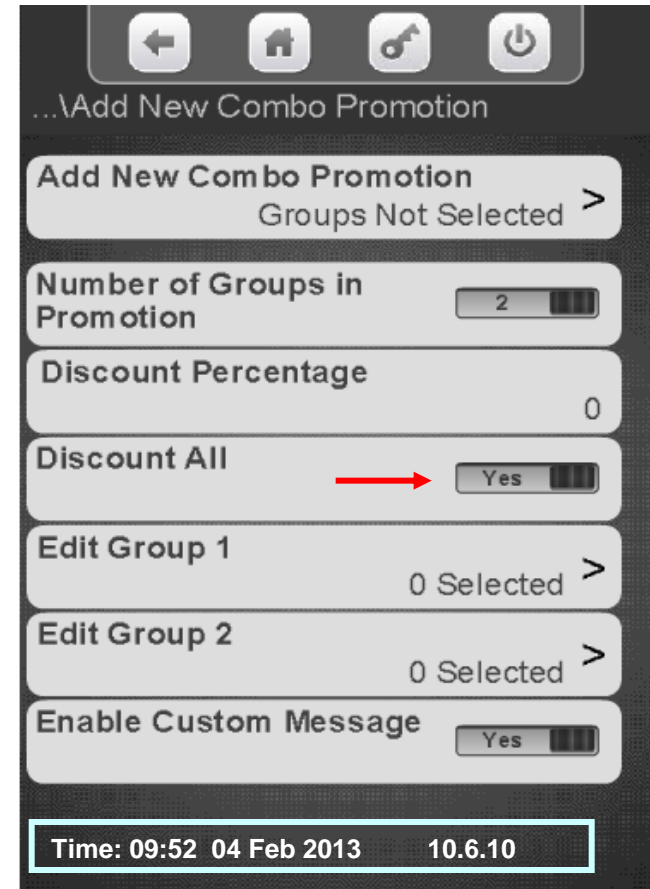

## Main Menu

- Across the top of the Main Service Menu is a series of four icons that will always be present when in the service menu.
  - The left arrow returns you to the prior menu
  - The small house icon returns you to the Main Service Menu
  - The Key icon is not currently used.
  - The Power icon is not currently used.
- The content of the title Main Menu will change depending what menu you are in. This helps you remember which menu you are in.

# How do I use the Touchscreen in the Service Mode?

- All the features normally associated with a touchscreen, its icons and menu bars are possible, including:
  - Touching an icon to toggle it's current state (On to Off, Yes to No, etc), or
  - Touching a menu item to access another level of the tiered menu system.
  - Alpha & numeric keypads will pop up when required for input.
  - Confirmation boxes will appear to confirm an item to be added or deleted.
- Another feature of this screen is that it shows the current time and date, and current Atlas LE board software revision at the bottom of the screen.

# Menu Chart

# Service Mode Menu Chart

Full details on all Service Modes can be found in the full User's Guide, available at [www.cranems.com](http://www.cranems.com)

## Menus 1 to 6

- |                           |                              |                        |
|---------------------------|------------------------------|------------------------|
| Non-Resettable Sales Data | Show Errors with Time & Date | Test Vend              |
| Resettable Sales Data     |                              | Coin Return Motor      |
| Events                    |                              | Reliability Test       |
| Identification Number     |                              | Surround Lighting Test |
|                           |                              | Screen Test            |
|                           |                              | Refrigeration System   |
|                           |                              | MagTeck Head Test      |
|                           |                              | Cashless system test   |

## Price Menu

From the Main Menu Touch the Price Icon to access the price setting Menu.

There are three options for setting prices:

- By Tray
- Entire Machine
- Individual Prices

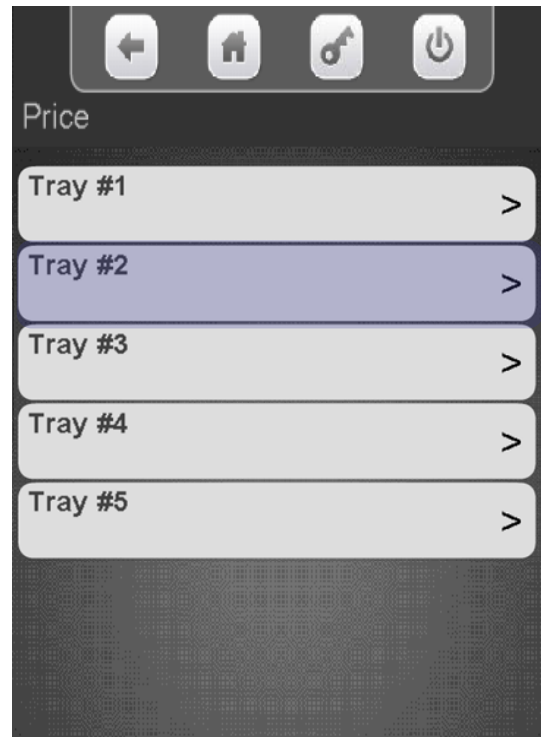

# Price Menu

## Setting Individual Prices

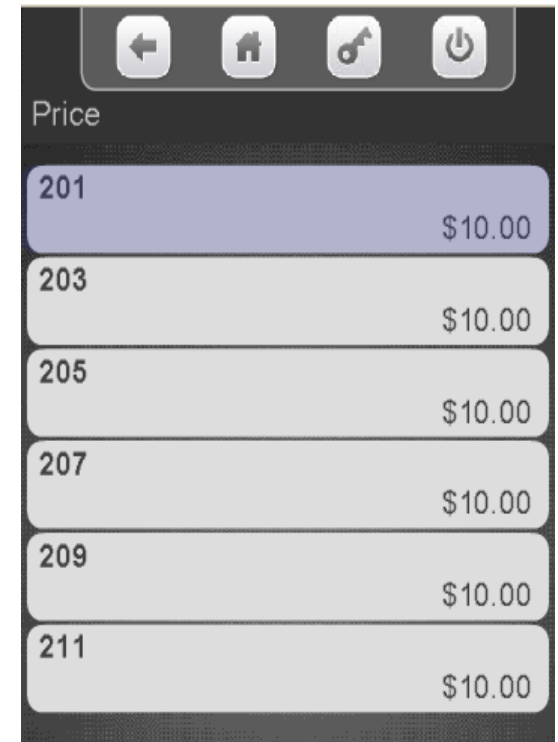

Step 1 –  
Touch Individual Prices

Step 2 –  
Touch a Tray

Step 3 –  
Touch a Selection

# Price Menu

## Setting Individual Prices

### Setting Individual Prices

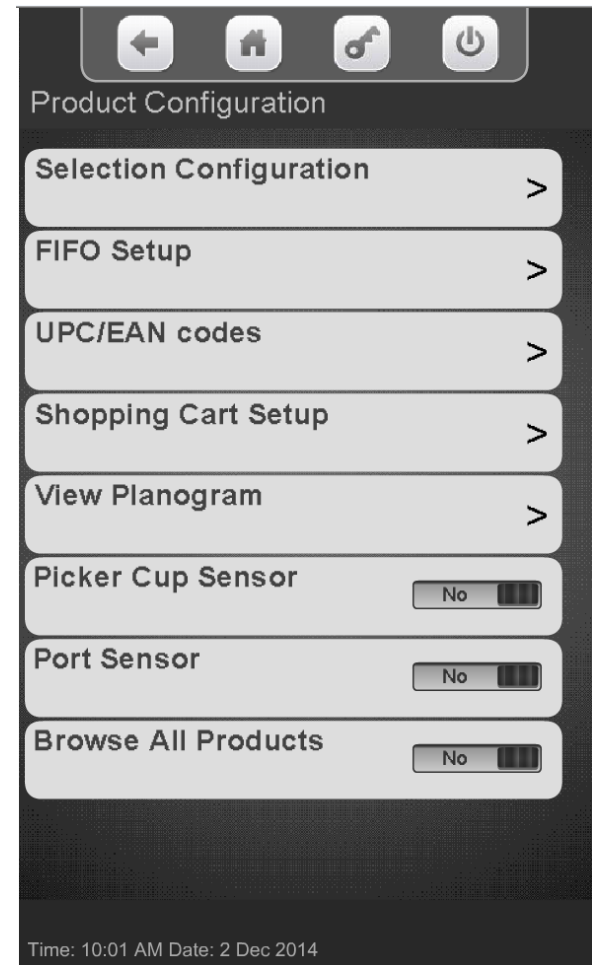

- A numeric keypad will appear on the screen along with a window displaying the current price.
- The left arrow above Done is your backspace key.
- Use the numeric keypad to enter the new price for the that selection, Press Done to save.
- Location and presence of a currency symbol will be dependent upon the type of payment devices installed in the machine

# Product Configuration

- The Product Configuration menu provides access to the following modes in the machine:
  - Selection Configuration
  - First in-First out (FIFO) Setup
  - UPC Setup (Package UPC)
  - Shopping Cart Setup
  - View Planogram
  - Picker Cup Sensor
  - Port Sensor
  - Browse all Products

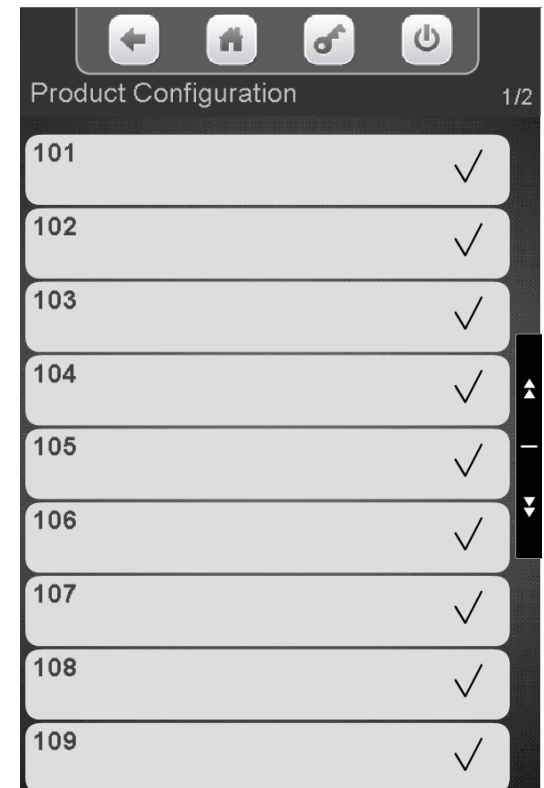

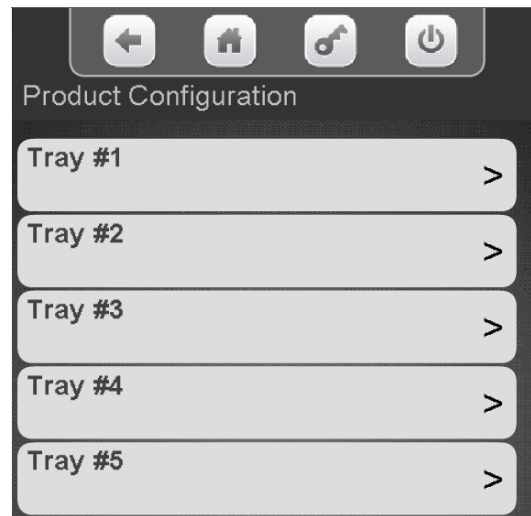

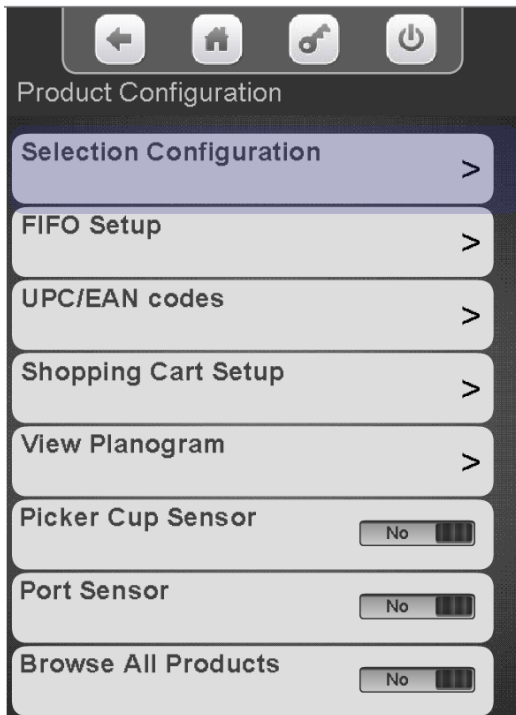

# Product Configuration Selection Configuration

Touch Selection Configuration to enter the menu.

A list of all trays present will appear.

A list of all available selections will appear. This would let you disable an individual selection for a maintenance issue.

# Product Configuration

## FIFO Setup

- This menu provides access to set up the FIFO or Space to Sales menu
- FIFO permits the user to select multiple identical items, and assign them to a Group which permits the machine to automatically select which actual selection assigned to a group is being delivered.
- Example: Selections 205, 206 & 207 contain identical product. To ensure that the product is sold in sequence of loading, these 3 selections should be grouped. Once grouped, the machine will automatically select 205, then 206, then 207, then returning to 205 and starting the sequence again.

# Product Configuration

## FIFO Setup

- Following the example on the previous page, the steps would be in sequence
  - Add Group Menu
  - Create New Group
  - Assign selections to the New Group
- Selections are not required to be on the same shelf, or column, except as required for visual appearance
- It is important that pricing for each selection chosen be the same.

# Product Configuration

## FIFO Setup

- The next screen show selecting a tray, for this example, Tray 2
- Then selecting the selections to assign to this group for FIFO assignment.
- Once you have chosen the Grouped selections the process is complete.
- If a planogram file has been installed, then each selection will display the same image and nutritional information.

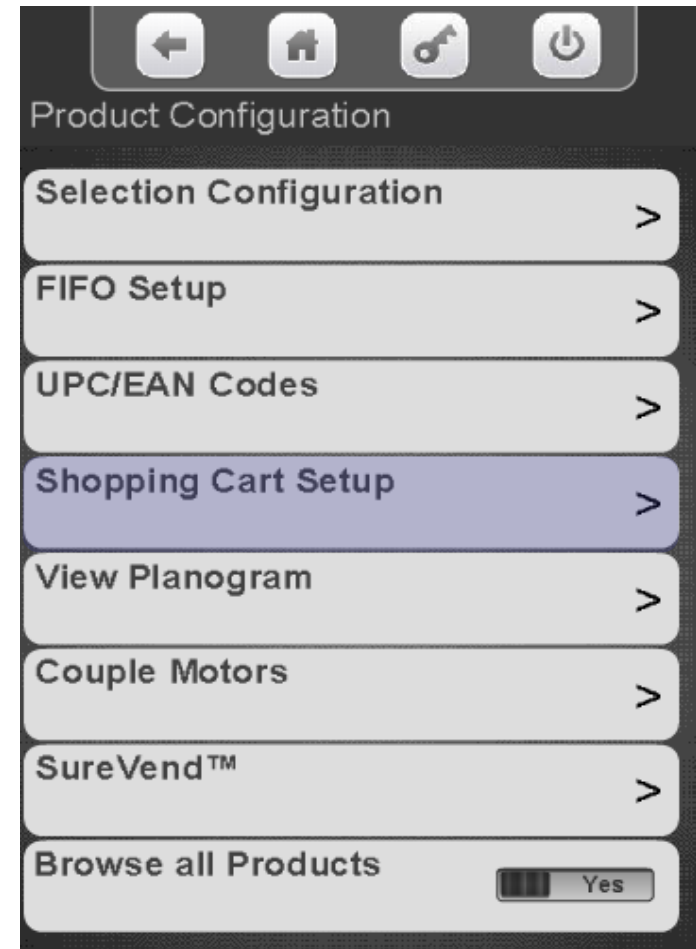

# Product Configuration

## Shopping Cart Setup

- This menu provides access to set up the Shopping Cart.
- Shopping Cart permits the user to select multiple items, and place them into a virtual “Shopping Cart” and purchase them in a single financial transaction.
- Recommended Shopping Cart maximum size is 3 items.
- Max Fund amount can should be calculated by multiplying the highest vend price in the machine times the Shopping Cart size.

**Note:** When Rapid Vend is turned on under the Special Vend Mode the Shopping Cart function is automatically disabled.

Continued 

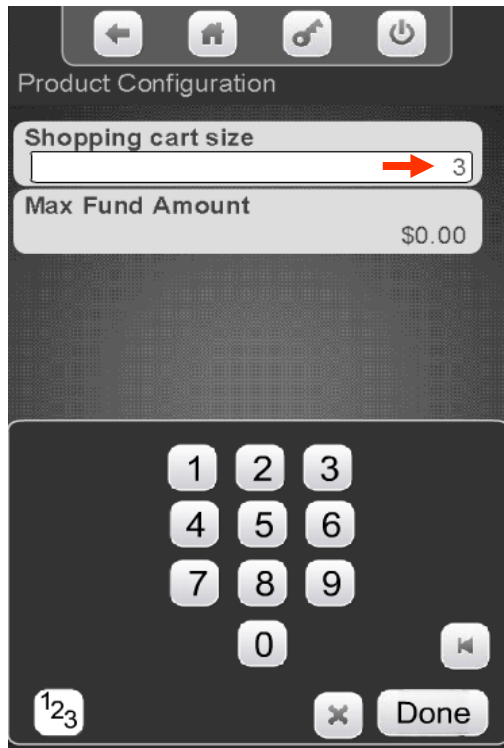

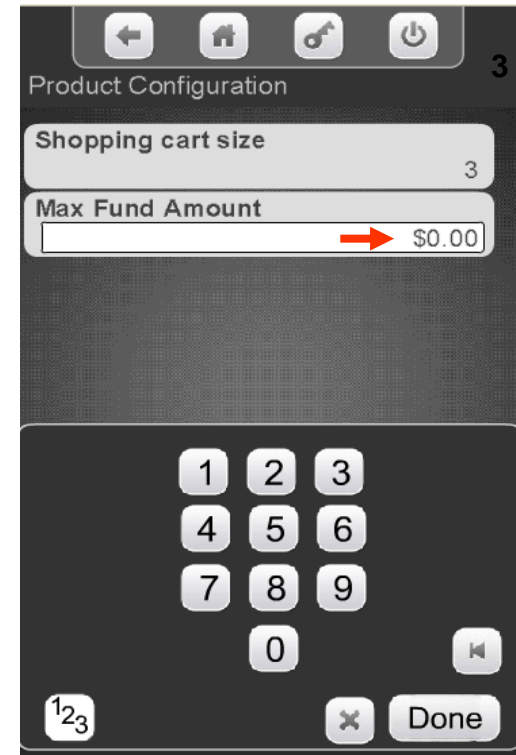

# Product Configuration

## Shopping Cart Setup

Touch Shopping Cart Size. Use the numeric keypad to enter the quantity of items allowed in the Shopping Cart. Press Done when finished

Select Max Fund Amount to set the maximum amount of funds in the cart, We recommend the cart size times the highest vend price. Press Done when finished.

# Product Configuration

## Shopping Cart Setup

**Note:** The Max Fund amount menu can also be utilized allow the machine to be used as a bill changer.

For example, if you wish to allow for change of a \$10.00 bill, you can set the Shopping Cart Max Fund Amount to \$10.05, which will allow the machine to stack a \$5 or \$10 bill. When the coin return is pressed, change is returned. The same idea applies to a \$5 or \$20 bill, using \$5.05 or \$20.05 respectively.

If Rapid Vend is turned on you must turn it off for the shopping cart menu to appear, set the amount to be paid back in this menu, then turn Rapid Vend back on if desired.

# Monetary Menu

## Monetary Menu Icon

- Allows you to program the settings for all credit devices and related functions.
- Touch Money to enter the Menu.

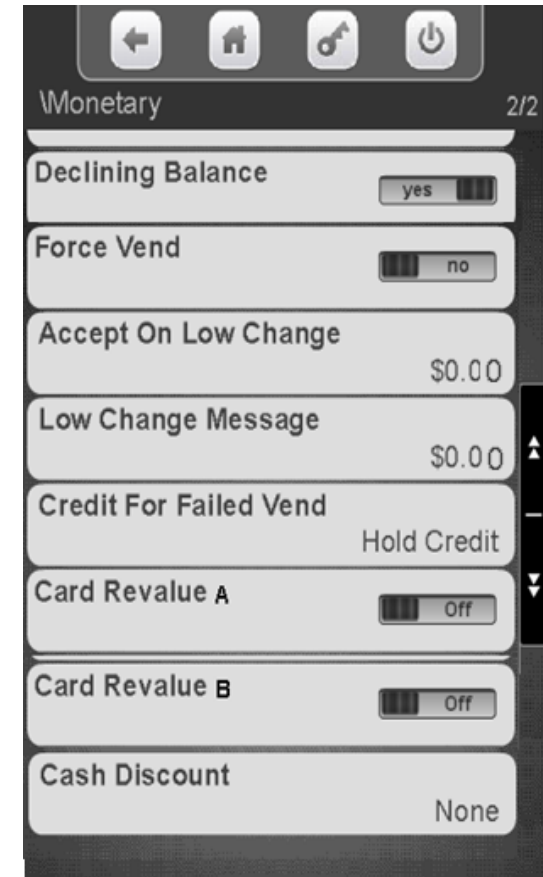

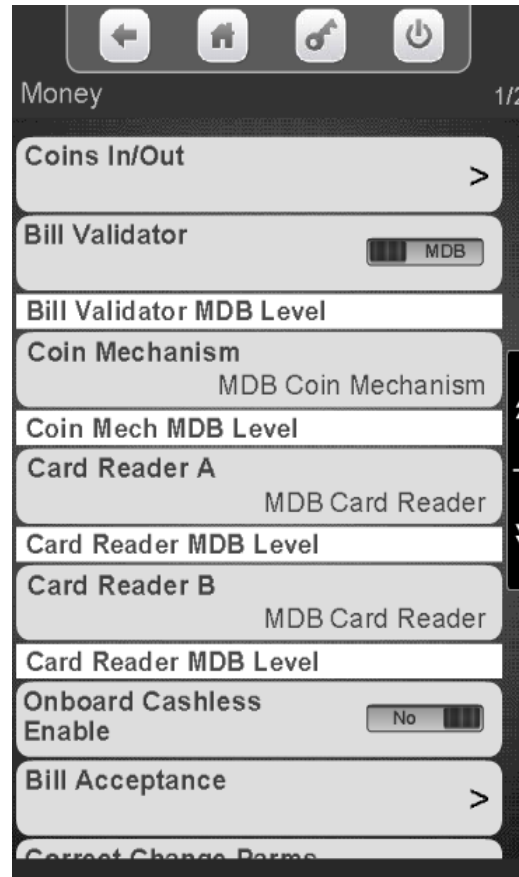

# Monetary Menu

## The Monetary Menu

provides access to the following Menus:

- Coins In/Out
- Bill Validator
- Coin Mechanism
- Card Reader A&B
- Onboard Cashless
- Bill Acceptance
- Declining Balance
- Force Vend
- Accept on Low Change
- Low Change Message
- Credit For Failed Vend
- Card Revalue A&B
- Cash Discount

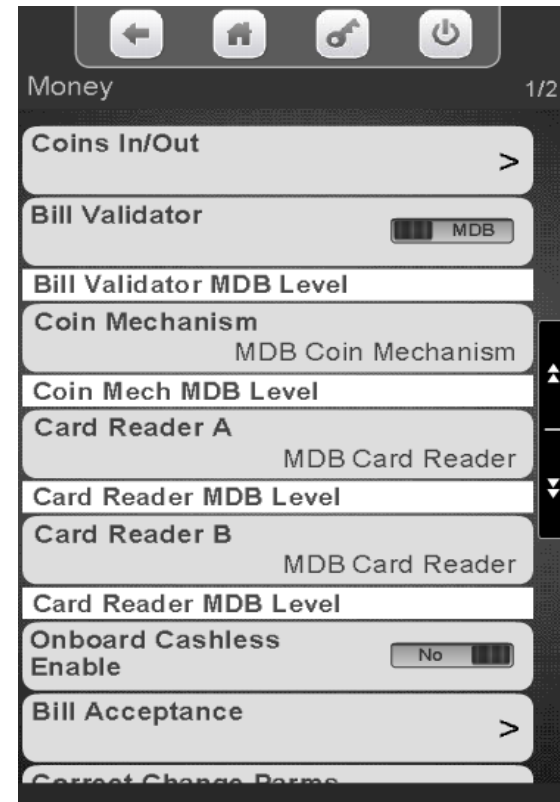

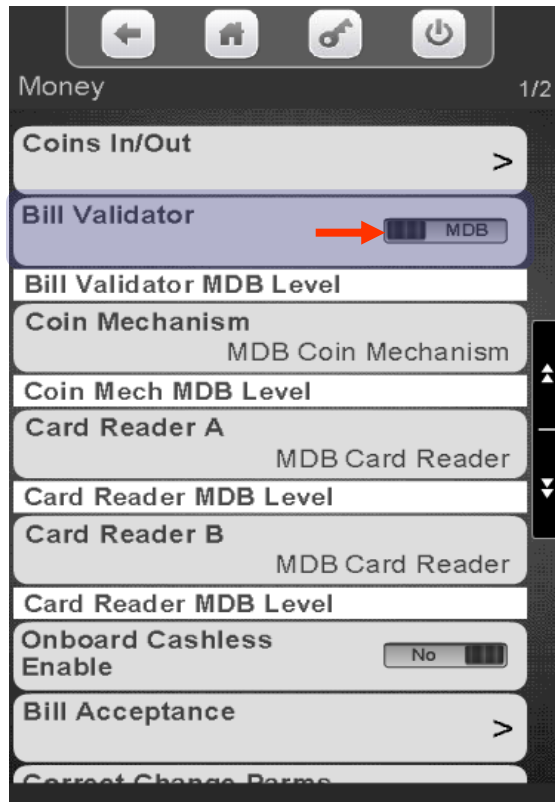

# Monetary Menu

## Bill Validator Enable

Touch Bill Validator to toggle between **MDB** or **No Bill** validator.

Once communication is established the communication level of the Bill Validator will be shown

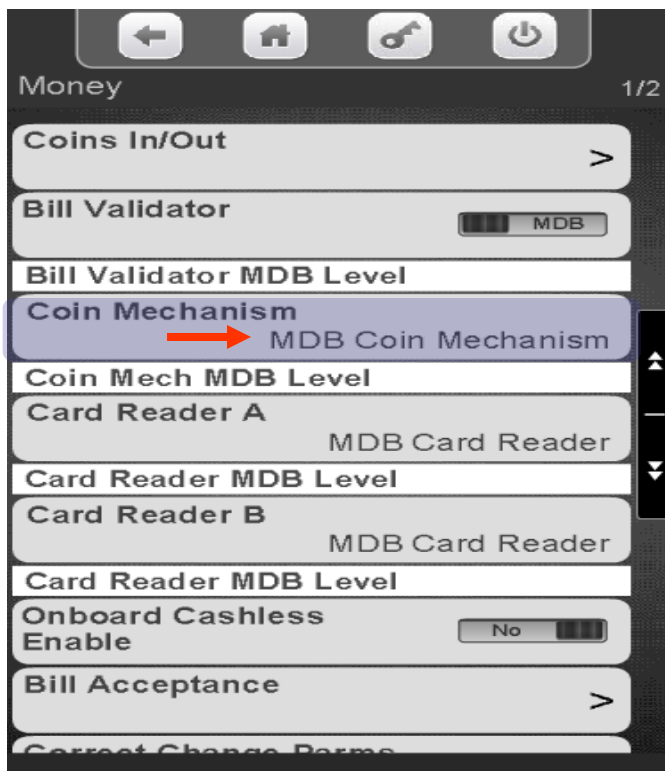

Monetary

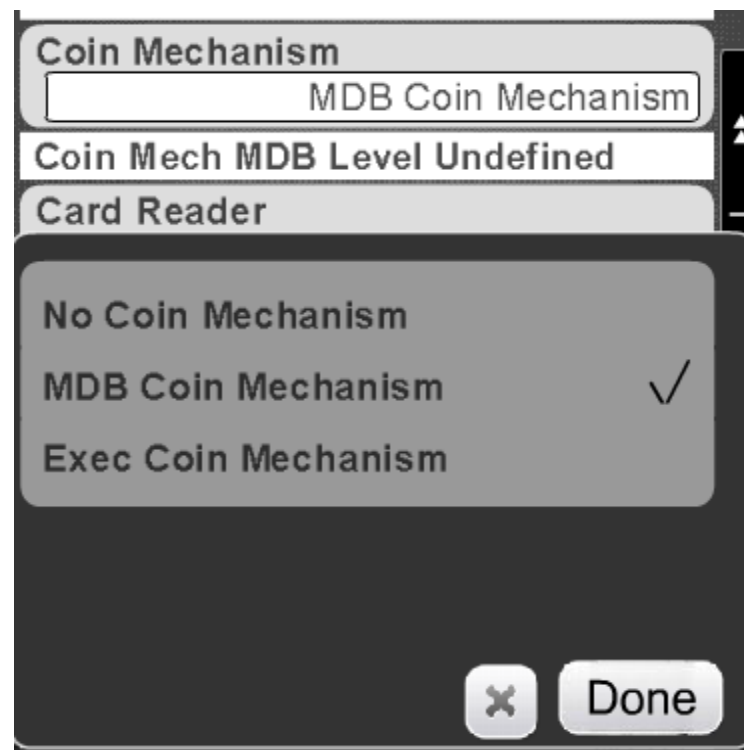

# Monetary Menu

## Coin Mechanism Enable

Touch Coin Mechanism to choose the coin mechanism type. The current setting is shown without entering the menu.

Touch the desired Coin Mechanism option and press Done to save.  
*Note: Exec is not used in the US.*

# Monetary Menu

## Card Reader Enable

### Card Reader / Cashless Options

- There are three menu Bars as shown on the right for Card reader and/or cashless options.
- There are two menus for MDB card reader and one for an onboard reader.
- MDB is an add on card reader that plugs into the MDB harness in the machine. Your options in this menu are MDB card reader or No Card Reader. This option is set under the Card Reader Menu Bar.
- Onboard is a swipe built into the front of the machine and the options are Yes or No.
- Currently it is not possible to have two external MDB card readers in the machine at the same time. You can operate one external MDB card device, and the Onboard cashless reader at the same time.

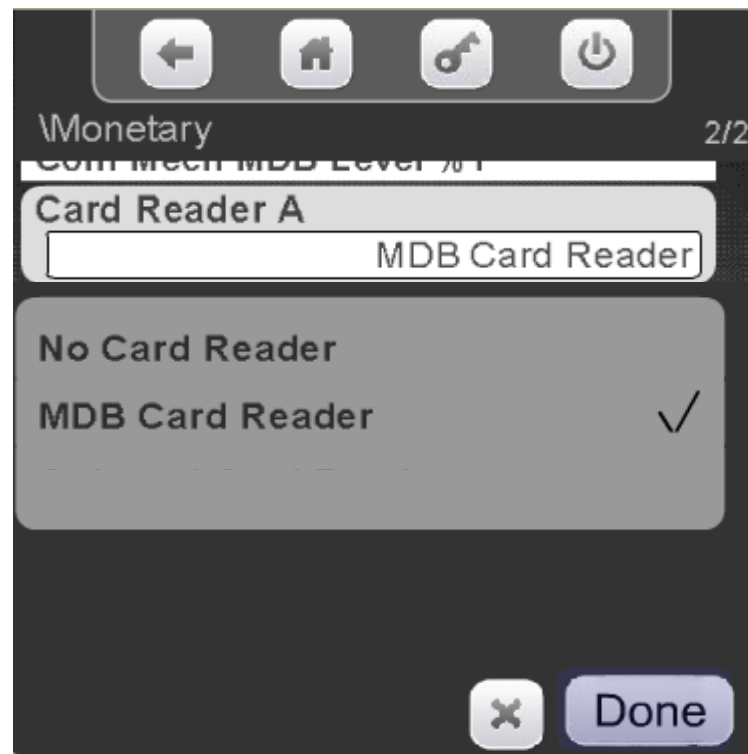

Monetary

# Monetary Menu

## Card Reader Enable

Touch Card Reader A or B to choose your MDB card reader option. The current setting is shown without entering the menu.

Touch MDB or No Card Reader, Touch Done to save or X to exit without saving.

# Monetary Menu

## Onboard Cashless Enable

Touch Onboard Cashless Enable to toggle between Yes and No.  
An Onboard card reader is a built in card swipe that plugs directly into the Atlas controller at J42.

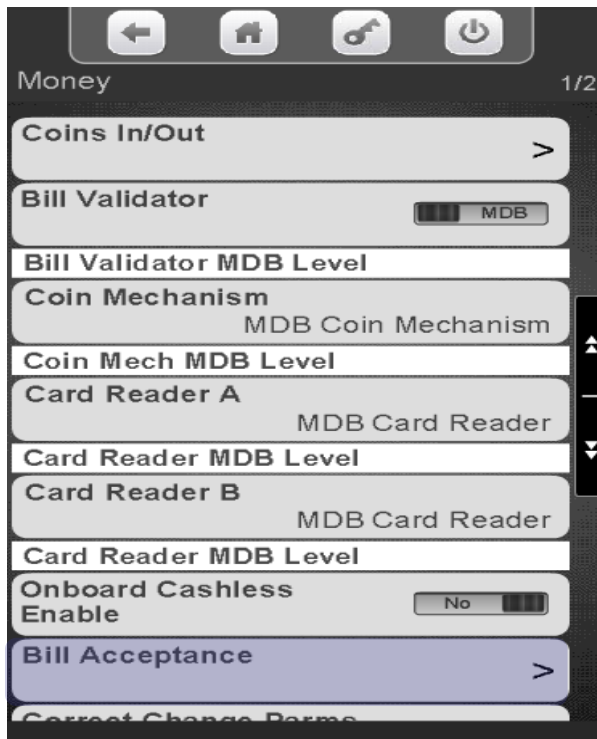

# Monetary Menu

## Bill Acceptance

Touch Bill Acceptance to enter the menu. All denominations enabled on the Bill Validator will be shown. Notes shown will change based on the country of destination.

Touch the value on the display to select or unselect the bill/note denominations you wish to accept/not accept. Token must be enabled to accept Tokens or Coupons. Note: You will also need to choose what selections work with tokens or coupons in the Special Vend Modes Menu.

# System Settings

## Systems Settings Menu Icon

- Allows you to program the overall systems functions.
- Touch System Settings icon to enter the Menu.

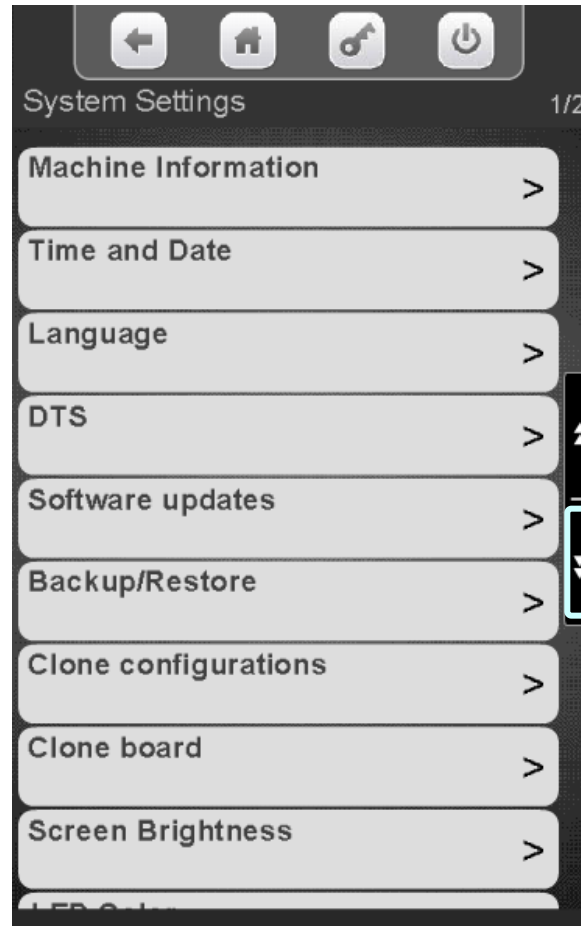

# System Settings

## System Settings

- Touching the System Setting Icon from the home screen allows access to the System Settings Menu shown on the two screens to the right.
- Touch the down arrow to scroll to the next menu screen.
- Touch the up arrow to return to the previous menu screen.

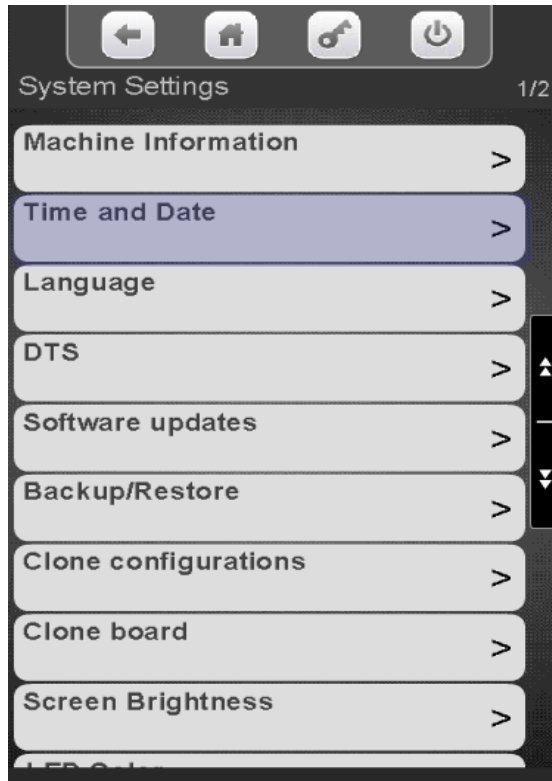

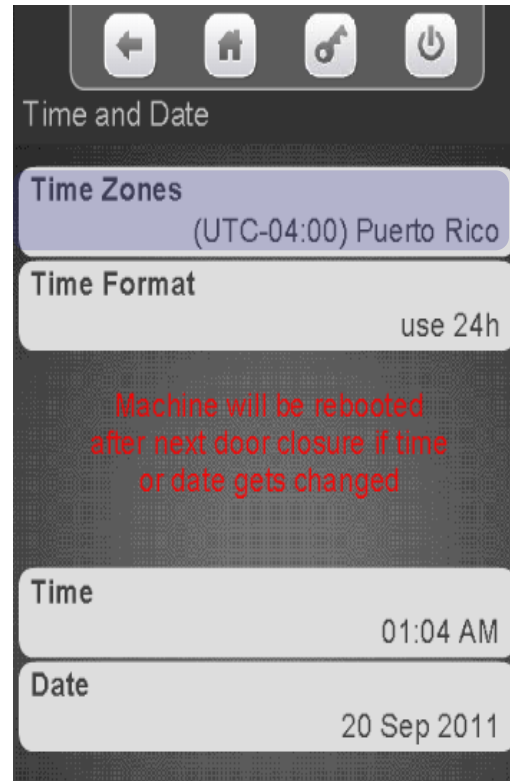

# System Settings

## Time and Date

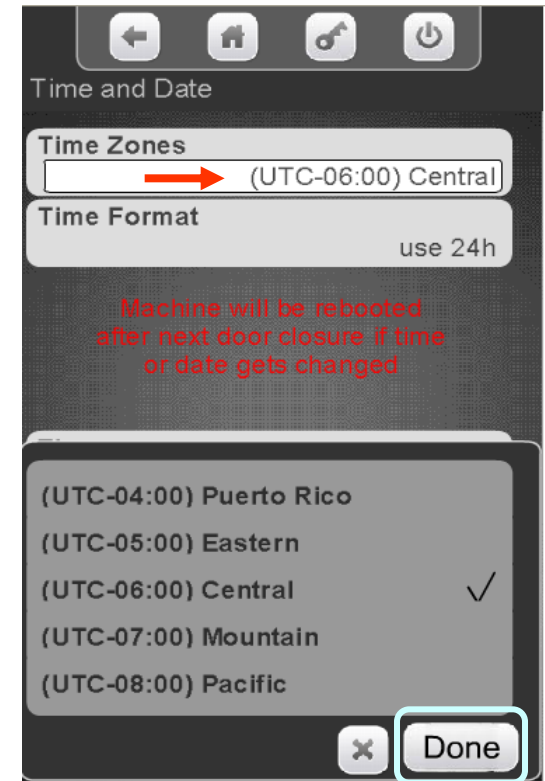

Touch the Time and Date menu bar to access the Time and Date Menu.

Touch to set your Time Zone

Touch your Time Zone followed by Done.

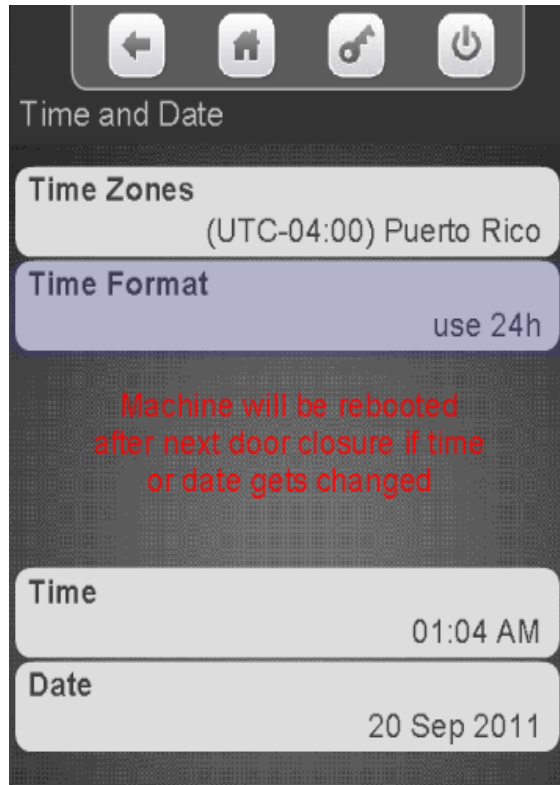

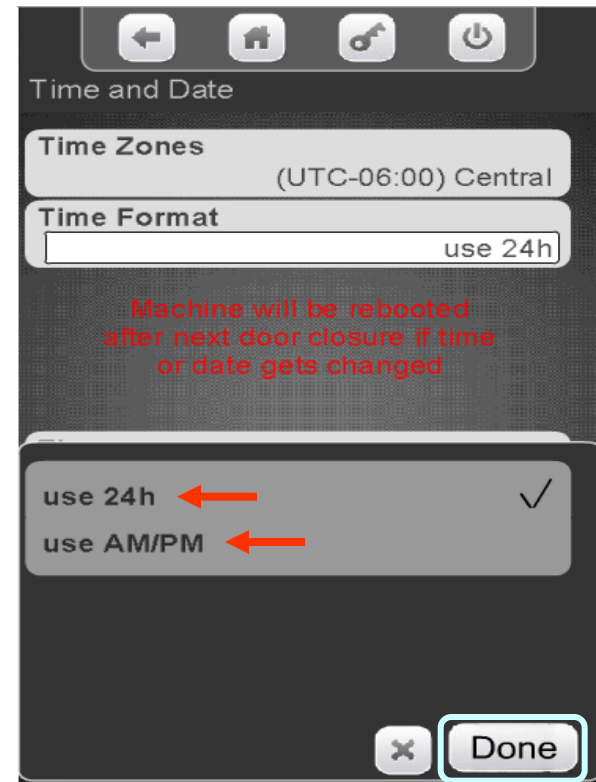

# System Settings

## Time and Date

Touch Time Format to change the Format between 24 hours and AM/PM.

Touch your desired format.  
Touch Done to save.

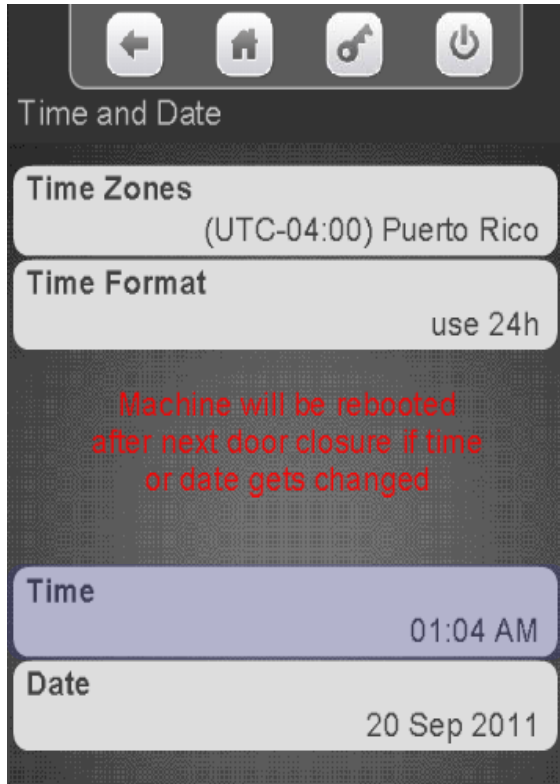

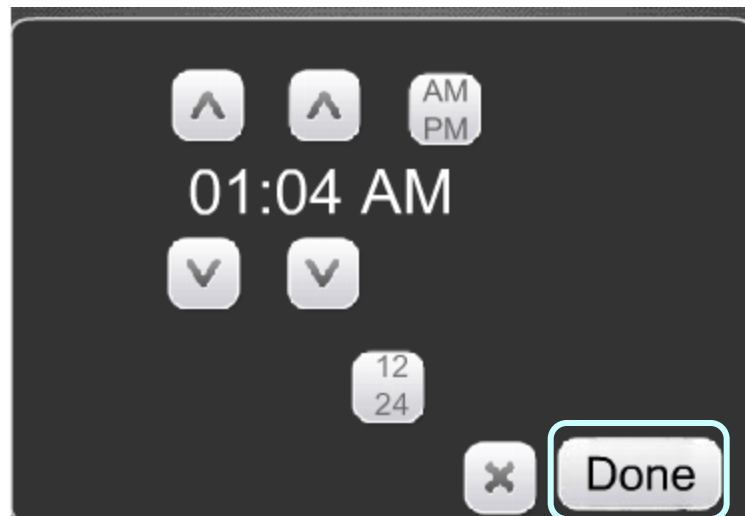

# System Settings

## Time and Date

Touch the Time menu bar to change the current time .

Touch the arrows key above and below the hour or minutes to change the time. Touch the AM/PM or 24 hour icon change your time format. If the format is changed here it will also be changed in Time Format menu. Touch Done when finished. **Press the door switch after setting the time and/or date, this will cause a reboot and ensure the Time & Date are saved.**

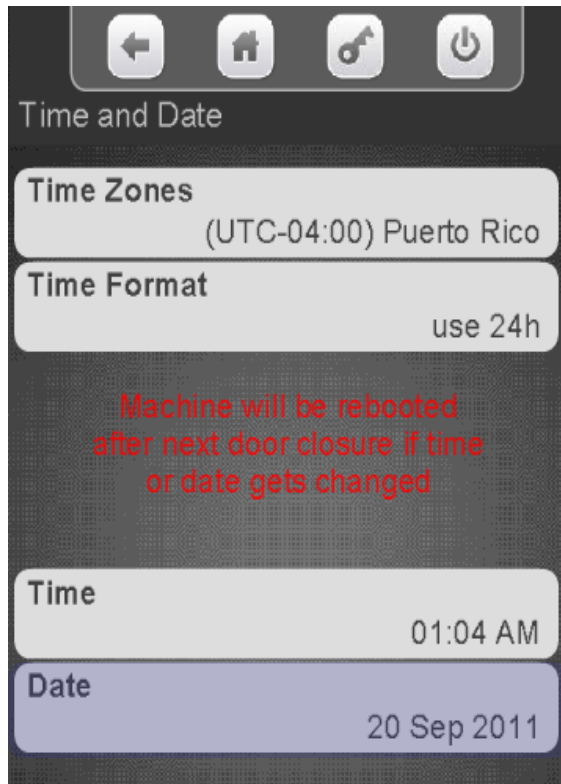

# System Settings

## Time and Date

Touch the Date menu bar to change the Current Date .

Touch the arrow keys above and below the Day, Month and Year to change the date.  
Touch Done when finished.

Press the door switch after setting the time and/or date this will cause a reboot and ensure the Time & Date are saved.

# System Settings

## Language

### The Language Menu allows you to:

- Customize the Languages available to your customer.
- As shown in the picture to the right, you can enable multiple Languages at one time.
- The Language used in the service menus can also be changed and are independent of the customer languages set.
- Additional Languages can now be uploaded without changing the software, starting with version 10.8.4.

**Note:** You must have “Skip Main Menu” set to No when multiple Languages are enabled. This menu is located under the “Special Vend Modes” icon accessible from the main menu.

# System Settings

## Language

Touch Service Application or User Interface to change the current Language options.

Touch a Language and Press Done to apply that Language as a default for the Service Menus. Repeat this process for the User Interface Messages, as required.

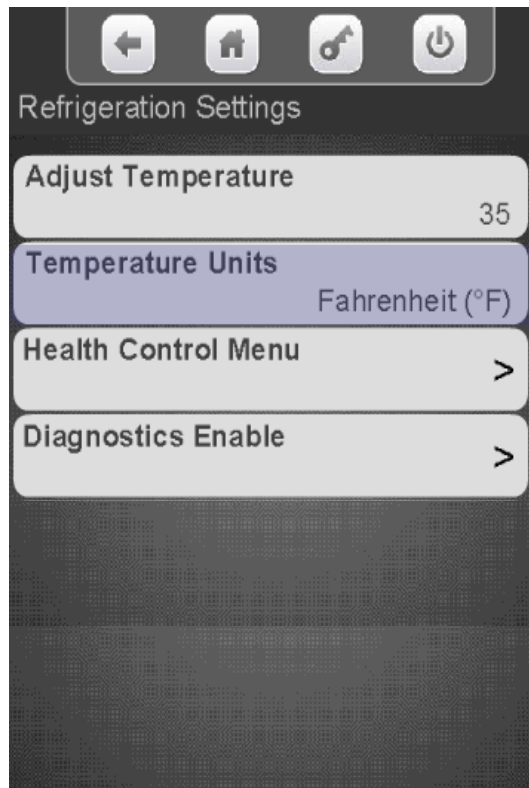

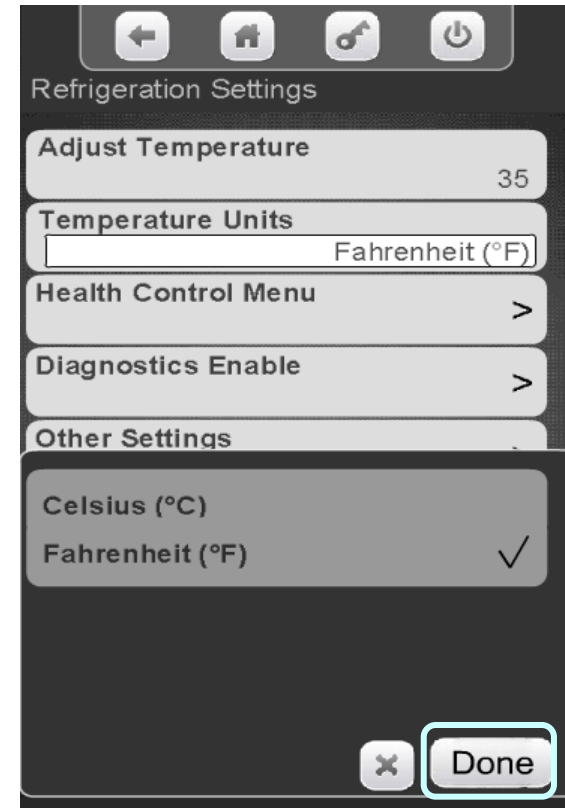

# System Settings

## Refrigeration Settings – Temperature Units

Touch Temperature Units to change the viewable Temperature between Fahrenheit and Celsius

Touch Fahrenheit or Celsius. Touch Done to save!

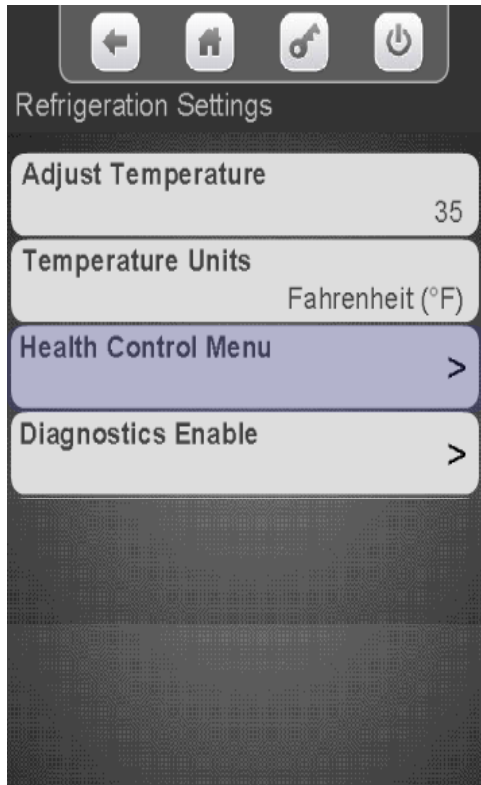

# System Settings

## Refrigeration Settings – Health Control

Touch Health Control to enter the Menu

On the display Touch the tray number you wish to view or change.

All available selections are shown. Touch a selection to add a checkmark to the selections that are active for Health Control.

# Firmware Information

## Firmware Information

Touching Firmware on the keypad brings up an information screen that displays the following information:

- All the MDB peripherals in the machine including manufacturer, serial number and software version.
- The software version of the SureVend™ board.
- The software version of the I/O board.
- The software version of the LE board.
- The serial number of the Atlas control board, along with the software version, and kernel file version.

The screenshot shows a mobile application interface with a dark background. At the top, there is a navigation bar with four icons: a back arrow, a home icon, a key icon, and a power icon. Below the navigation bar, the title 'Firmware Information' is displayed. The main content area contains a table with the following data:

Bill Validator		
disconnected	-/-	-/-
Card Reader		
disconnected	-/-	-/-
Coin Mechanism		
disconnected	-/-	-/-
LE Board	Ver.	Kernel
120400039	10.2.0	2.6.34
I/O Board Version		0222
SureVend Version		0103

Error Description	Probable Cause	Possible Solutions
Stuck Keys Fatal.	Stuck keys on keypad or shorted connections/harness.	Check connectors to be properly installed. Check harness for damage. Replace the keypad.
No Monetary Device Fatal.	The control board has not been able to detect a working monetary device.	Check connectors to be properly installed. Check harness for damage. Check for faulty bill validator/harnessing. Retest without the bill validator and harnessing installed Replace the coin mechanism.
CM No Comms.	No Communications are occurring between the coin mechanism and the control board.	Check connectors to be properly installed Check harness for damage Retest without the bill validator and harnessing installed Replace the coin mechanism.
CM ROM Error	Coin Mech ROM Error	Replace the coin mechanism.
CM Acceptor Unplugged	Coin Mech Acceptor Unplugged.	Check the connections within the coin mechanism Replace the coin acceptor. Replace the coin mechanism.
CM Acceptor Jammed	Coins or other items are stuck in the acceptor causing the gate to remain open.	Remove the coins or other items from the acceptor.  Replace the acceptor. Replace the coin mechanism.
CM Payout Jammed.	Coin pay out motor or solenoid is stuck in cycle.	Check for and remove bent coins or other items causing the jam. Replace the coin mechanism.
CM Sensor Error.	Bad coin mechanism sensor.	Check for an item causing a blockage and remove. Replace the coin mechanism.
# XX Coin Mech Tube Empty.	The coin mechanism is reporting that there is an empty payout tube. (# XX indicates which tube is reported empty.	Check for an empty tube and replenish. Check for a bad sensor. Replace the coin cassette. Replace the coin mechanism.
CM All Tubes Error.	Coin mechanism not sensing any pay out tubes.	Check for proper pay out cassette placement. Replace the payout cassette. Replace the coin mechanism.
CM Tube Error.	Coin mechanism not sensing a payout tube.	Check for proper pay out cassette placement. Replace the payout cassette. Replace the coin mechanism.
CM Disabled.	Coin mechanism has been disabled by the board	Power down the machine and re-start. Remove bill validator and/or card reader from system. Replace the coin mechanism. Reset the control board. Replace the control board.
Exec Price Error.	Executive coin mechanism error.	Replace executive coin mechanism. Check for a price set outside of allowed parameters.

Error Description	Probable Cause	Possible Solutions
No Monetary Device.	No monetary device detected by the board.	Check connectors to be properly installed. Check harness for damage. Remove bill validator and/or card reader from system. Replace the coin mechanism.
Coin Return Motor Not Present	Control board not sensing the presence of a coin return motor.	Check the connection J6 on the I/O board to the coin return motor. Home the coin return motor. Replace the coin return motor. Check for damage to harnessing. Reset or replace the control board.
Coin Return motor Run Time Timeout.	The board has determined that the coin return motor should have arrived at home position, but it has not.	Check the connections to the coin return motor. Home the coin return motor. Replace the coin return motor. Check for damage to harnessing. Reset or replace the control board.
Coin Return Motor Short Circuit	Coin return motor has shorted out.	Check connections and harnessing for damage. The coin return motor is not engaging the
Coin Return Motor Drive Failure	The Coin Return motor is not engaging the coin return arm on the coin mechanism	Check for damaged or missing drive linkage. Check for proper mounting of coin mechanism. Check for damage on coin mechanism pay out parts.
Low Change.	The coin mechanism has reported a low or empty condition in one or more of the coin pay out tubes	Add coins to the tubes using the coins in/out screen in the monetary section of the service modes. Do vendts with coins to add coins to the tubes. Replace coin mechanism.
No IO Comm.	The control board is not communicating with the I/O Board	Check for proper connections on the I/O board. Check for proper connections on the control board. Check for damage to the harnessing. Remove the monetary devices from the system and check for restored communication, since they share the MDB buss Replace the I/O board. Reset and/or replace the control board.
Please Wait.	The board is asking you to wait while it completes an ongoing operation.	Wait for the board to finish the operation.  Re-start the machine and let it re-boot. Remove monetary devices and re-start the machine. Reset and/or replace the control board.
No Selections Available.	The control board is not sensing any motors available for use.	Check for motors to be homed. Check for motors and harnesses to be connected to I/O board Check for power to I/O board. Replace I/O board. Reset and/or replace control board.

Error Description	Probable Cause	Possible Solutions
All Selections Disabled.	The control board has disabled all the motors in the machine	Check SureVend settings and operation. Check for a timed event to be enabled causing the condition Check/replace I/O board. Reset/replace control board.
IO Board Voltage.	The control board has detected improper voltage for I/O board operation.	Check voltage to the machine. Check voltage to the I/O board. Replace the I/O board. Remove the monetary devices from the system and check for restored voltage, since they share the MDB buss
Init Failed.	The control board has failed to initialize successfully.	Power down and re-start the machine. Power down, disconnect monetary devices and restart the machines Replace the control board.
Health Control Active.	The control board has detected a temperature condition which is outside the allowed parameters and has stopped allowing sales of involved products.	Check for clean screens and condenser. Check for acceptable clearance behind the machine. Check temperature sensor for accurate readings. Check refrigeration system for proper function.
Anti Jackpot Error.	The control board has detected multiple attempts to vend a product from a selection and has not seen a successful delivery.	Check SureVend calibration. Check SureVend function. Check motor function.
# XXX Sold Out.	The control board has determined that a selection is sold out. (XXX indicates the selection number).	Check to see that there is product. Check SureVend calibration. Check SureVend function. Check motor function.
Factory Init.	An attempt to restore factory default settings has been unsuccessful.	Power down, power up, try again. Power down, remove monetary devices and try again. Replace the control board and reset.
CR No Comms.	The control board is not able to communicate with the card reader.	Check connections for the card reader. Check for damage to the harness (cut, pinched, etc.). Replace the card reader. Reset the control board. Replace the control board.
CR Comms Error.	The control board is not communicating with the Card reader.	Check the connections and harness for damage. Check the settings on the board and on the reader. Replace the reader. Reset and/or replace the board.
BV No Comms.	The control board is not communicating with the bill validator.	Check the connections and harness for damage. Check the connections and settings for the validator. Replace the harness. Replace the validator.
BV Motor Error.	The validator has reported an error to a drive motor within the validator.	Check for a broken belt or blockage. Replace the bill validator.

Error Description	Probable Cause	Possible Solutions
BV Sensor Error.	The validator has reported an error to a sensor within the validator.	Check for a sensor blockage. Replace the bill validator.
BV ROM Error.	An error has been detected in a main chip in the validator	Replace the bill validator.
BV Acceptor Jammed	A jam in the bill path has been detected.	Check the bill path for items that are blocking sensors. Check to see that the bill path gates are not open. Clean sensors per manufacturer's instructions Replace the bill validator.
BV Stacker Error.	An error has been reported concerning the bill box.	Check the bill box is correctly installed on the validator Replace the bill box. Replace the bill validator.
BV Stacker Full.	The bill validator is reporting that the bill box is full	Check for an excess quantity of bills and remove them. Check validator diagnostic messages Replace the bill box. Replace the bill validator.
BV Disabled.	The control board has disabled the bill validator.	Check for coins in the payout tubes of the coin Check for a fault with the bill validator. Verify Validator setting in Money Menu are correct
Check Winner Prize.	The control board has detected a failed winner vend.	Check for the presence of product. Check motor function.
POWER OFF.	The control board has detected a power outage.	Check the power cord and GFCI plug. Check the circuit breaker. Check the On/Off switch in the machine.
DOOR OPEN.	The control board is reporting that the door has been opened	Check to see if someone has been in the machine. Check the door switch. Check switch connections and harnessing for damage.
Power Save mode.	The machine is in a power save event.	Let the event complete. Modify or eliminate the event in the software settings.
Sold Out Machine.	The control board has determined that all selections in the machine are sold out.	Check SureVend settings and function. Check for vend motor function. Check harnessing connections. Check for board function (selection configuration).
Recycler Motor Problem.	A problem has been detected with a motor inside the recycler	Check for an obstruction or blockage within the recycler which is preventing the motor from completing a complete cycle Replace the recycler
Recycler Sensor Problem.	A problem has been detected in a sensor within the recycler	Replace the recycler cassette. Replace the recycler
Recycler Jam.	The recycler is unable to function.	Check for an obstruction or blockage within the recycler which is preventing the motor from completing a normal cycle Replace the recycler cassette. Replace the recycler
Recycler Checksum Error.	A communications error has been reported between the recycler and the control board.	Check the bill validator harnessing for damage. Re-start the system to restore communication. Replace the recycler.

Error Description	Probable Cause	Possible Solutions
Recycler Disabled.	The recycler has been disabled by the control board.	Check for proper function of the recycler unit (errors). Verify Validator setting in Money Menu are correct Replace the recycler
BV Stacker Motor	An error has been reported concerning the stacker motor in the validator or recycler	Check the bill path for a blockage preventing the correct stacking of a bill in the bill box  Replace the bill validator/recycler
CR Manu Trans Error	The card reader has reported an error in transmitting data.	Check the card reader for proper function. Verify telemetry functions Reset the card reader and retry. Replace the card reader.
CR Service Error.	An internal error has occurred within the card reader	Reset the card reader and retry. Replace the card reader.
CR Manufact Error.	An internal error has occurred within the card reader	Reset the card reader and retry. Contact the card reader manufacturer for assistance Replace the card reader.
CR Failed OOS Error.	An internal error has occurred within the card reader	Reset the card reader and retry. Contact the card reader manufacturer for assistance Replace the card reader.
CR Comms OOS Error	An internal error has occurred within the card reader	Reset the card reader and retry. Contact the card reader manufacturer for assistance Replace the card reader.
CR Jam OOS Error.	An internal error has occurred within the card reader	Reset the card reader and retry. Inspect Card Entry slot for a jam Contact the card reader manufacturer for assistance Replace the card reader.
CR Manufact OOS Error	An internal error has occurred within the card reader	Reset the card reader and retry. Contact the card reader manufacturer for assistance Replace the card reader.
BV Recycler Gate Error	An error has been detected in the recycler gate	Check for a blockage in the bill path which prevents the bill gate at the entrance to the recycling cassette Replace the recycling cassette Replace the recycler.
Capacity Sensor Failure.	An error has been reported with a sensor inside the bill validator.	Re-start the bill validator and check function. Replace the bill validator
BV Recycler Tape Error	An error has been reported in the operation of recycling tape within the recycling cassette	Check for a blockage in the bill path which prevents the he tape from moving backward and/or forward. Replace the recycling cassette Replace the recycler.
Optical Sensor Failure.	The failure of an optical sensor within the bill validator/recycler has been detected.	Check & clean the bill path for an obstruction or blockage which prevents the optical sensor from functioning. Replace the bill validator/recycler

Error Description	Probable Cause	Possible Solutions
Magnetic Sensor Failure.	The failure of the magnetic sensor within the bill validator has been detected.	Check the bill path for an obstruction or blockage which prevents the magnetic sensor from functioning. Replace the bill validator/recycler
Recycler Cass Jammed.	The recycler cassette is not able to move.	Check the bill path for an obstruction or blockage which prevents the recycling cassette from functioning by manually unloading bills Replace the recycling cassette Replace the recycler.
BV Path Jammed.	A blockage of the bill path has been reported.	Check the bill path for an obstruction or blockage which prevents normal operation.  Replace the bill validator/recycler
BV Cashbox Jammed	The bill box has become jammed and is not allowing the stacker motor to complete its cycle.	Check for a full bill box, remove bills  Check for damaged bills blocking the operation of the Stacker Plate Replace the bill box. Replace the bill validator.
Stacker Out Of Position.	The control board has detected that the stacker has stopped out of its home position.	Check the bill path for an obstruction or blockage which prevents the stacker motor to complete its cycle. Check for proper installation of the bill box. Replace the bill box. Replace the bill validator.
Recycler Out Of Position.	The recycler is not able to accept bills.	Check for proper installation of the recycler cassette.  Check for an obstruction or blockage which is preventing the cassette from locking into position. Replace the recycler cassette. Replace the bill validator.

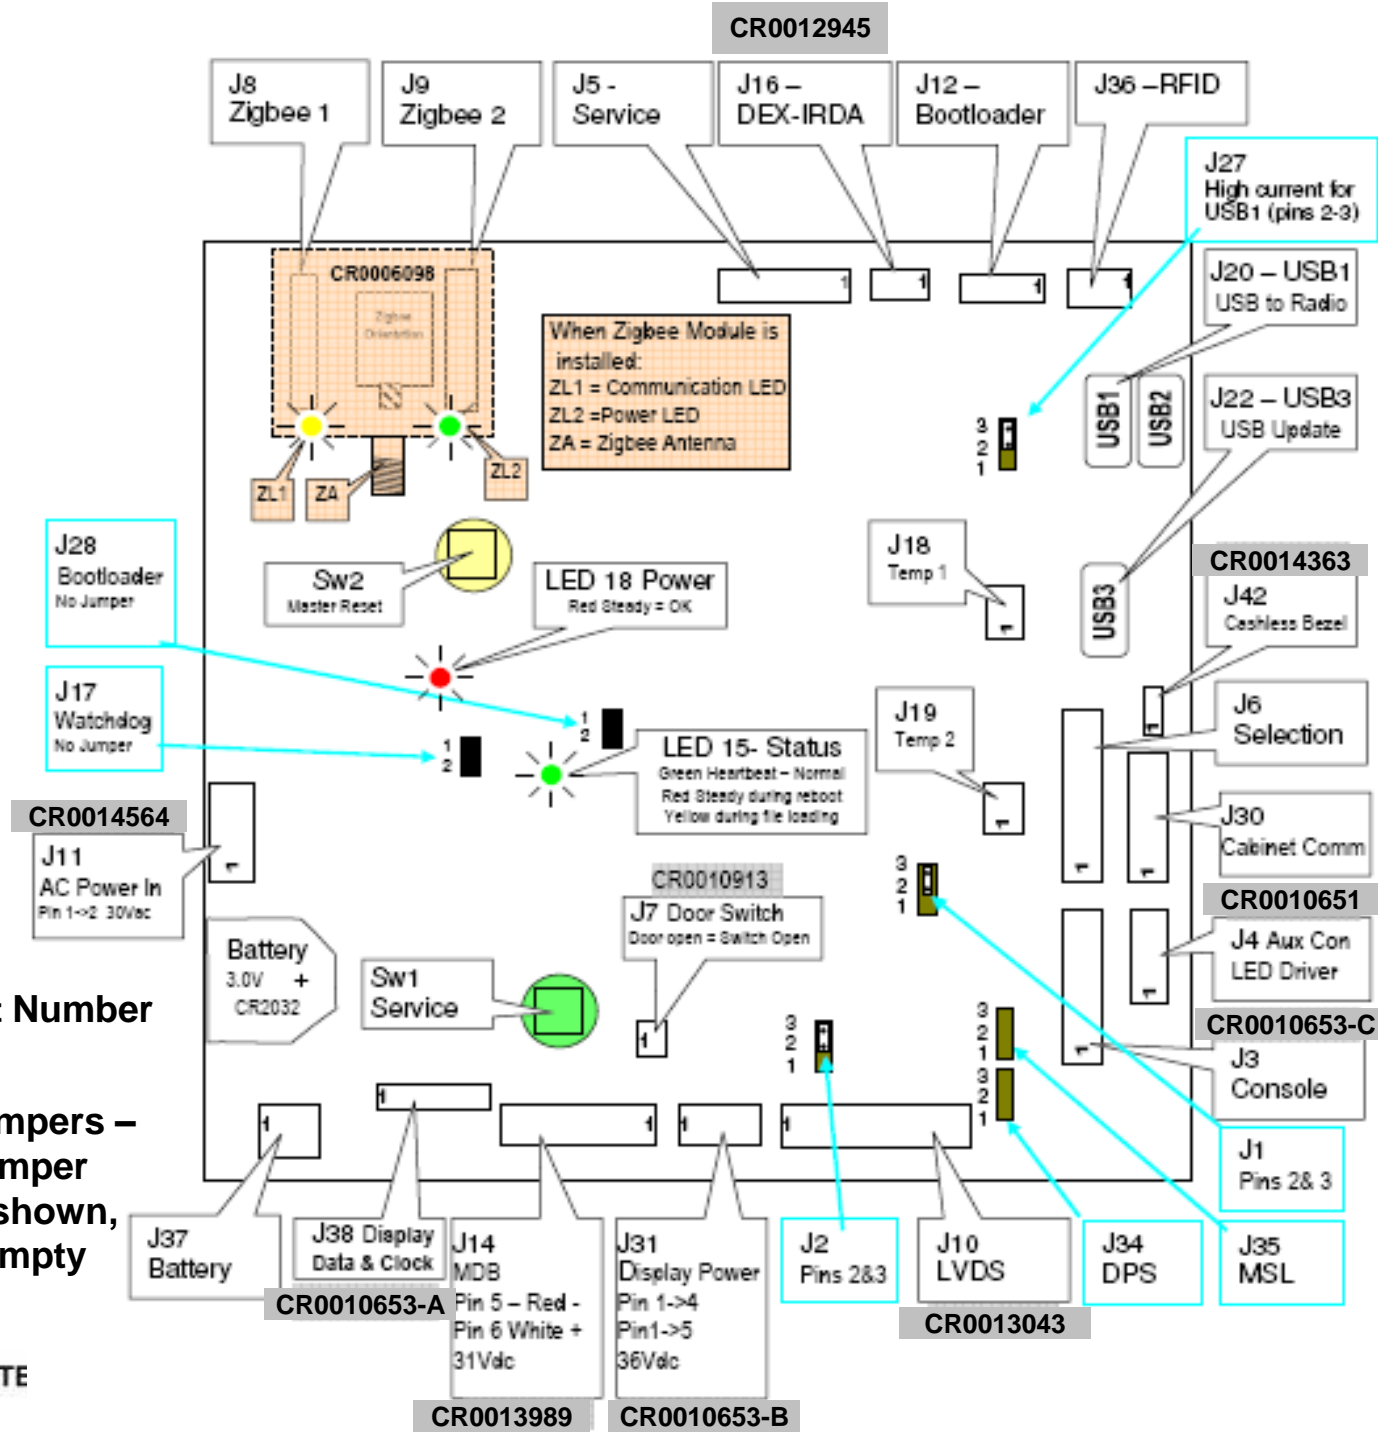

Error Description	Probable Cause	Possible Solutions
<b>BevMax Media Specific Errors</b>		
X Motor Failure.	The control board is reporting that the X motor is not functioning.	Check for proper connections to the motor. Check for damage to the harnessing. Check for proper switch function. Check for over tightening of the motor. Replace the motor.
Y Motor Failure.	The control board is reporting that the Y motor is not functioning.	Check for proper connections to the motor. Check for damage to the harnessing. Check for proper switch function. Check for over tightening of the motor. Replace the motor.
X Motor Home Failure	The X motor home switch is not detected	Check XY Assy is all the way to the left at the top Replace the X Home Switch. Replace the Atlas Board.
Y Motor Home Failure	The Y motor home switch is not detected	Check XY Assy is all the way to the left and Delivery Cup is all the way to the bottom. Replace the Y Home Switch. Replace the Y Board. Replace the Atlas Board.
Picker Home Failure	The picker home switch is not detected	Check the plunger is all the way in at the home position. Replace the Picker Home Switch. Replace the Delivery Cup Assy. Replace the Y Board. Replace the Atlas Board.
Port Open Error	The port closed switch is not detected.	Check the port door is all the way closed. Replace the Port Closed Switch. Replace the Port Assy. Replace the Atlas Board.
Picker Motor Failure	The control board is reporting that the picker motor is not functioning.	Use the position test functions to test the picker motor.  Replace the picker cup.
Picker Home Failure	The control board is reporting that the Picker has failed to return to home at the end of a vend cycle or the motor is not functioning.	Use the position test functions to test or cycle the picker back to its home position. Replace the picker cup.
Port Motor Failure	The control board is reporting that the Port motor is not functioning.	Use the port test functions to test for function Check wiring connections. Check switch functions including the position cam. Replace the motor.
Vend Timeout.	The control board is reporting that a successful vend cycle has not been completed in the allowed amount	Check for a picker cup that did not return to the home position Check for a port door that did not open/close.
Cabinet Failure.	Undefined Cabinet error	Use I/O No Comm errors
Coin Return Motor Failure	The control board is reporting that the coin return Motor has failed.	Check the wiring connections. Check for proper mounting of the motor. Check for proper mounting of the coin mechanism. Replace the coin return motor.

Error Description	Probable Cause	Possible Solutions
<b>Refrigeration Errors</b>		
Temperature Sensor Error	Control Board is reporting that the temperature sensor has failed, or is out of range	Compare the reported temperature against a known good thermometer to verify correct temperature Replace the temperature sensor.
Cooling System Not Cooling	Control Board is reporting that the cooling system is not functioning	Check for a bad temperature sensor.  Check for other errors that would cause the refrigeration system to have been shut down by the board, as example, an incorrect or corrupted Set Point or Storage Temperature
Cabinet Too Hot.	The control board is reporting that the cabinet is operating at three degrees, or more, above the allowed parameter.	Check for an accurate temperature reading Check Refrigeration Relay for proper operation in the Test menu Check refrigeration system for proper function ((clean screens, condenser also distance from rear wall). Check for proper fan operation.
Cabinet Too Cold.	The control board is reporting that the cabinet is operating at three degrees, or more, below the allowed parameter.	Check for an accurate temperature reading Check Refrigeration Relay for proper operation in the Test menu Check refrigeration system for proper function ((clean screens, condenser also distance from rear wall). Check for proper fan operation.
Health Check Error.	The control board is reporting that an error occurred in the process of conducting a health check.	Check temperature sensors for proper function. Check the refrigeration system for function. Reset machine for another cool down period to check for proper health control function.  Reset the control board to default settings and set up for another test. Replace the control board and re-test.
Heath Timer Error.	The control board is reporting that an error has for proper health control function.	Check temperature sensors for proper function. Check the refrigeration system for function. Reset machine for another cool down period to check for proper health control function.  Reset the control board to default settings and set up for another test. Replace the control board and re-test.
Health Recheck Error.	The control board is reporting that an error has for proper health control function for a second time	Check temperature sensors for proper function. Check the refrigeration system for function. Reset machine for another cool down period to check for proper health control function.  Reset the control board to default settings and set up for another test. Replace the control board and re-test.

Copyright (C) 1989, 1991 Free Software Foundation, Inc. 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301, USA Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed. **Preamble**

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software—to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Lesser General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

### TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.

b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.

c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange;

c) Accompany it with the information you received as to the offer to distribute corresponding source code. This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through this system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

**NO WARRANTY**

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OF THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

### END OF TERMS AND CONDITIONS

#### How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

one line to give the program's name and an idea of what it does. Copyright (C) yyyy name of author This program is free software; you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation; either version 2 of the License, or (at your option) any later version. This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details. You should have received a copy of the GNU General Public License along with this program; if not, write to the Free Software Foundation, Inc., 51 Franklin Street, Boston, MA 02110-1301, USA. Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this when it starts in an interactive mode:

Gnomovision version 69, Copyright (C) year name of author Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type `show w'. This is free software, and you are welcome to redistribute it under certain conditions; type `show c' for details. The hypothetical commands `show w' and `show c' should show the appropriate parts of the General Public License. Of course, the commands you use may be called something other than `show w' and `show c'; they could even be mouse-clicks or menu items—whatever suits your program.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the program, if necessary. Here is a sample; alter the names:

Yoodyne, Inc., hereby disclaims all copyright interest in the program "Gnomovision" (which makes passes at compilers) written by James Hacker. signature of Ty Coon, 1 April 1989 Ty Coon, President of Vice This General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Lesser General Public License instead of this License.
