LA RADIOSA

Innovation Without Compromise

EVOCA
GROUP

LA RADIOSA: INNOVATION WITHOUT COMPROMISE

- In the 1930s Achille Gaggia found a way to create the perfect Italian espresso
- Today, Gaggia Milano brings coffee professionals a range of machines that combine state of the art technology with sophisticated design

STYLISH IN ANY SETTING

- Eye-catching design
- Compact footprint
- Stylish accessories
- Customisable drinks

DESIGN FEATURES

GAGGIA MILANO brand

10.1" touch screen user interface

RGB lateral stripes on the door
(up to 256 colours)

EVO MILK:
Hot and cold foamed milk

24V rotating pump for coffee
and solubles (water flow
electronically adjustable)

Embedded IoT connectivity
(Wi-Fi and Bluetooth as
standard, 3G module as option)

EXCLUSIVE DESIGN

- Customise the look and feel of the machine
- Match your brand by customising the display
- Or match your mood by changing the LED lights

TABLET-STYLE USER INTERFACE

- A 10.1” tablet style interface
 - Intuitive and easy to use
 - Customise the drinks options
 - Configure the interface
 - Create your own drinks icons
- Dual mode
 - Self-service mode
 - Barista mode

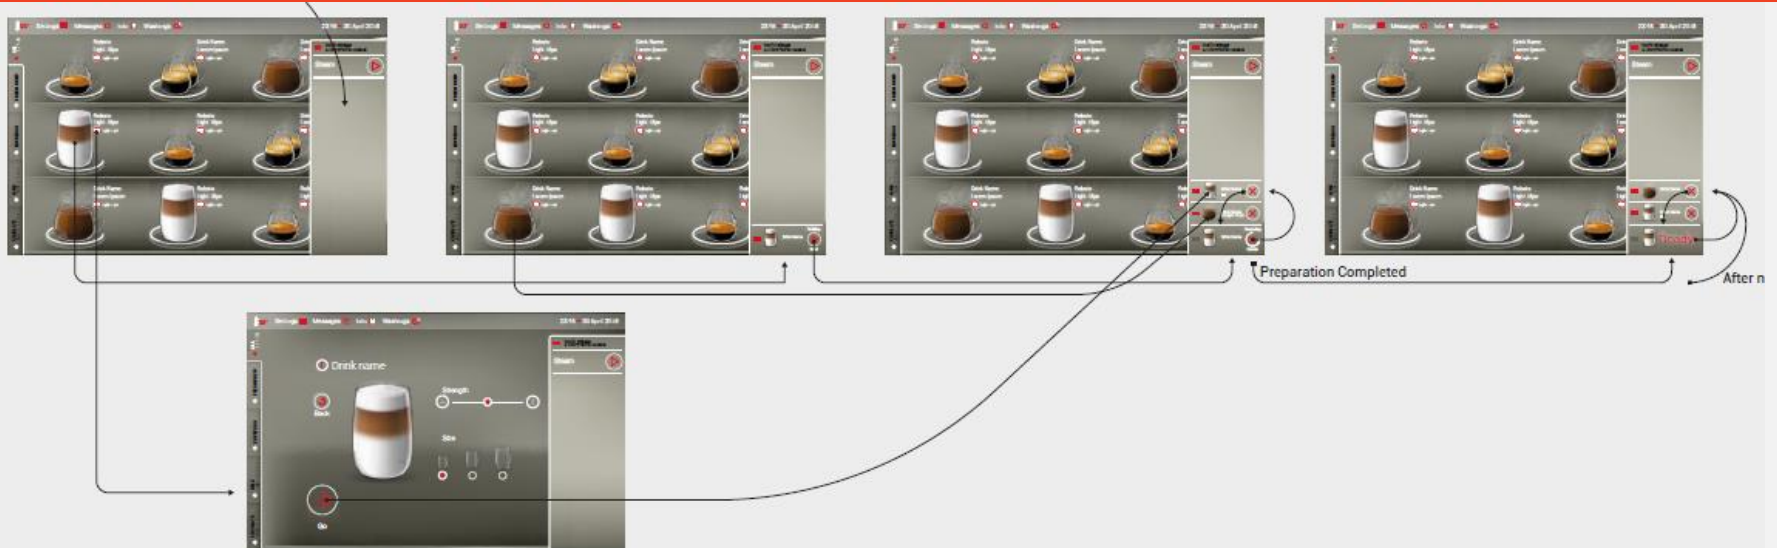

SELF-SERVICE MODE

- Direct Selection
- Ability to customise the drink
 - Cup size, Coffee Strength

BARISTA MODE

- Fast delivery
- Put more selections in a queue, if desired
- Possible to customise the drink (pre-selection)
 - Cup Size and Strength

FULL COFFEE SHOP EXPERIENCE

- For the full coffee-shop experience, EvoMilk technology creates smooth and perfectly foamed milk for a textbook cappuccino or flat white
- Create the drinks profile that you require

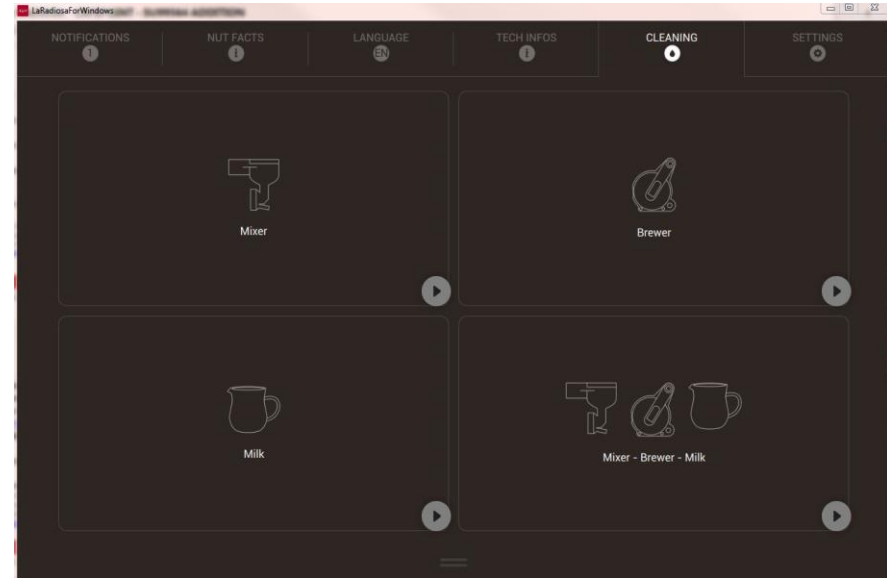

EVO MILK TECHNOLOGY

- Hot and cold foamed milk (~13°C - 75°C)
- Perfect milk foam with very fine texture
- Ability to set up different dose, temperature and foam density for each step of milk
- Create drinks with an “Italian cappuccino look”

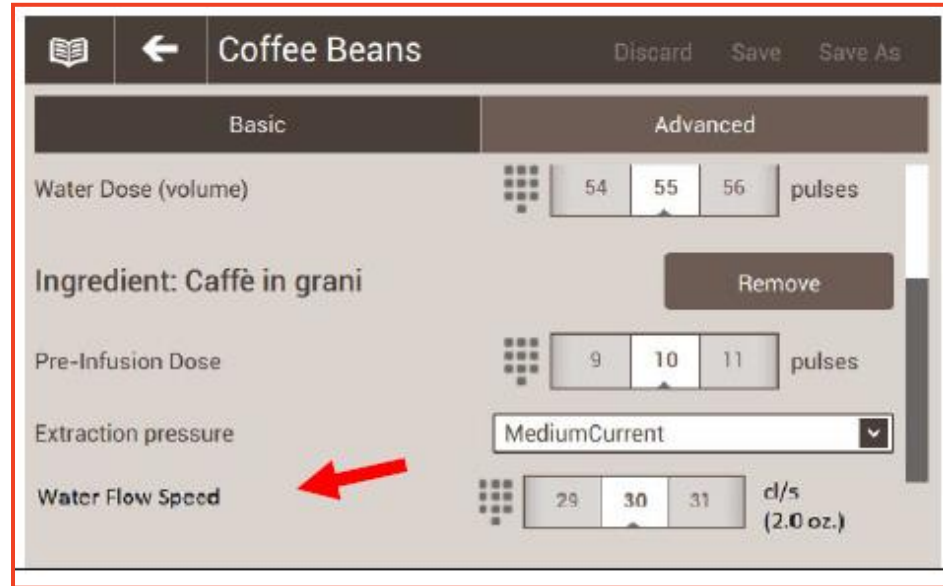

SIMPLE DAILY MAINTENANCE

- Automatic cleaning cycle:
 - Plug & play procedure
 - No need to remove parts for cleaning
 - Low water consumption ~0.5L
 - Detergent presence detector
 - User must only use milk detergent tablets

ADJUST TASTE PROFILES

- Set the water flow in order to:
 - Adjust the flow to obtain different taste profiles for coffee
 - Adjust the water for the solubles in order to increase the amount of chocolate powder the machine can deliver

ADVANCED HEATING SYSTEM

- The Radiosa creates the perfect drink without the need for a steam boiler, meaning that there is no requirement for PSSR testing
